PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Evaluated **enterprise application performance** and system reliability using **Splunk, CloudWatch, and Dynatrace**; managed P1/P2 incident response and SLA compliance, demonstrating ability to assess technical accuracy and real-world system validity under production constraints.
- Designed and implemented **Python-based data pipelines and ETL workflows** for automated reporting and data validation across **PostgreSQL, MySQL, and Oracle** databases; wrote well-documented analytical code for scheduled data processing and ad-hoc quantitative queries.
- Developed **REST APIs and microservices** in **Java Spring Boot** with feature work and bug fixes on existing services; performed code reviews and maintained **Git** workflows in Agile/Scrum environments, ensuring code quality and technical rigor.
- Built containerized applications using **Docker** and deployed to **AWS (EC2, S3, Lambda)** infrastructure; set up and maintained **Jenkins CI/CD pipelines** for automated testing and deployment, supporting reproducible and validated analytical workflows.
- Conducted **data analysis and validation** using **SQL** for schema design, performance optimization, and statistical querying; leveraged **pandas and NumPy** for exploratory data analysis and quantitative problem-solving in Python.
- Completed **MSc in Data Analytics** with coursework in statistical methods, predictive modeling, and data-driven decision-making; demonstrated fluency in written and spoken English (IELTS Band 7/9) and strong technical documentation skills across all project work.

SKILLS

Programming & Data Analysis – Python, Java, SQL, pandas, NumPy, Flask, FastAPI.

Statistical & Quantitative Methods – hypothesis testing, regression analysis, data validation, predictive modeling, ETL pipeline design.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting.

DevOps & CI/CD – Jenkins, Git, Jira, code review workflows, automated testing and deployment.

Monitoring & Reliability – Splunk, Dynatrace, SLA management, incident response, application performance evaluation.

Databases – PostgreSQL, MySQL, Oracle, query optimization, schema design.

Frameworks & APIs – Spring Boot, REST API development, Angular, React.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Quantitative Monitoring (HCL Technologies)

- Evaluated AI-generated and human-produced **system performance metrics** from enterprise Java/.NET applications using **Splunk and Dynatrace**; validated technical accuracy of automated alerts and performance predictions against real-world SLA requirements.
- Designed **SQL-based data validation queries** and **Python analysis scripts** to assess correctness of monitoring dashboards and anomaly detection outputs; provided structured feedback on data integrity and forecasting accuracy.
- Documented findings in clear technical reports; collaborated across teams to validate whether monitoring system outputs held up in practice, directly informing system improvements and reliability engineering decisions.

Data Pipeline & Analytical Code Development (HCL Technologies)

- Architected and implemented **Python-based ETL pipelines** using **pandas and NumPy** for data ingestion, transformation, and statistical analysis; validated pipeline correctness through ad-hoc **SQL queries** across **PostgreSQL and MySQL**.
- Wrote well-documented, production-grade analytical code with comprehensive testing; performed code reviews and refactoring to ensure end-to-end clarity and reproducibility of quantitative workflows.
- Deployed pipelines to **AWS Lambda** with scheduled execution via **Jenkins CI/CD**; monitored and optimized data processing performance, demonstrating practical experience with statistical inference and experiment design in automated systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
