+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **data integration pipelines** using **Python** and **SQL** (PostgreSQL, MySQL, Oracle) to enable interoperability between enterprise systems; created **ETL workflows** that processed and validated **25%+ daily data volumes** with **99.5% accuracy**.
- Executed technical analysis, configuration, and testing of **REST API** interfaces and **messaging protocols** across **Java Spring Boot** microservices; collaborated with cross-functional teams to troubleshoot integration issues and implement specifications according to established standards.
- Managed production support and monitoring of enterprise applications using **Splunk, CloudWatch, and Dynatrace**; responded to P1/P2 incidents with clinical and business impact, ensuring **SLA compliance** and system reliability across healthcare-adjacent domains.
- Performed detailed impact analysis and data mapping activities for application upgrades and interface changes; created comprehensive **logical and physical data models** to support system interoperability and documented specifications for internal and customer acceptance testing.
- Developed **test stubs, test harnesses, and automation scripts** using **Python** and shell scripting to validate interface configurations; assisted with full-range testing activities including unit, integration, and system testing across multiple project implementations.
- Deployed and managed containerized applications using **Docker** and **AWS** services (**EC2, S3, Lambda, CloudWatch**); configured **CI/CD pipelines** with **Jenkins** and **Git** to streamline integration delivery and enable rapid iteration on interface solutions.

SKILLS

Integration & Interoperability – Data mapping, REST APIs, messaging protocols, interface design, system interoperability.

Programming & Scripting – Python, Java, SQL, Shell scripting, Flask, FastAPI.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, ETL pipelines, data validation, schema design.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines.

Application Frameworks – Spring Boot, REST API development, microservices architecture.

Monitoring & Reliability – Splunk, Dynatrace, SLA management, incident response, production support.

Collaboration & Analysis – Jira, Confluence, Agile/Scrum, technical documentation, cross-functional teamwork.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Integration & Data Pipeline Initiative (HCL Technologies)

- Designed and implemented **Python-based ETL pipelines** to extract, transform, and validate data from multiple enterprise systems; integrated **PostgreSQL and Oracle databases** to achieve interoperability and ensure **data consistency across 15+ upstream sources**.
- Created **logical and physical data models** to map clinical and operational data between legacy and modern systems; developed comprehensive technical specifications for **interface work packages** adhering to established data governance standards.
- Automated testing and validation using **Python test harnesses** and **SQL assertions**; executed integration testing across **REST APIs** and database interfaces, identifying and resolving **25+ data quality issues** pre-production.

Production Support & System Reliability (HCL Technologies)

- Provided tier-2 production support for enterprise **Java Spring Boot** applications; monitored system health using **Splunk, Dynatrace, and CloudWatch**, responding to **P1/P2 incidents** with **average resolution time of 2 hours** to maintain SLA compliance.
- Troubleshoot integration failures and application bottlenecks by analyzing logs, performing **SQL queries** for data validation, and conducting **impact analysis** on system upgrades; documented root causes and preventative measures in client-facing technical reports.
- Deployed containerized microservices using **Docker** and **AWS services** (EC2, Lambda); configured automated monitoring and alerting via **CloudWatch** to enable proactive issue detection and reduce mean-time-to-resolution by **30%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
