PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **Spring Boot microservices** handling enterprise workflows with **REST APIs**, managing **P1/P2 incident response** and **SLA compliance** across production systems; leveraged **CloudWatch, Splunk, and Dynatrace** for observability, reducing mean-time-to-resolution by enabling rapid log analysis and metrics-driven debugging.
- Built **Python automation scripts** and **data pipelines** for ETL workflows and scheduled reporting, demonstrating practical experience with data orchestration and event-driven architectures applicable to agent request handling and context assembly.
- Developed and deployed containerized applications using **Docker** and **AWS services (EC2, S3, Lambda, CloudWatch)**, establishing CI/CD practices with **Jenkins pipelines** and **Git workflows**; automated infrastructure provisioning and deployment reducing manual overhead by **~40%**.
- Implemented comprehensive **SQL queries and schema management** across **PostgreSQL, MySQL, and Oracle** databases, supporting data validation and optimization; demonstrated ability to design robust data models for complex enterprise systems.
- Executed **code reviews** and participated in **Agile/Scrum ceremonies**, ensuring code quality and team alignment; contributed to knowledge sharing through **Confluence documentation** and pair programming sessions, establishing patterns for maintainability and compliance.
- Completed **MSc in Data Analytics** and specialized certifications in **Full Stack Java Spring Boot & Angular** and **Python Programming**, combining backend engineering rigor with emerging skills in data systems and automation; demonstrated commitment to continuous learning in AI/ML-adjacent domains.

SKILLS

Back-End & Microservices – Java, Spring Boot, REST APIs, Spring Data, Spring Cloud.

Cloud & Deployment – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines.

Data & Databases – SQL, PostgreSQL, MySQL, Oracle, Python (pandas, NumPy), ETL pipelines.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, log analysis, metrics collection, debugging.

Development Practices – Agile/Scrum, code reviews, Linux, shell scripting, Jira, test-driven development.

Emerging Technologies – FastAPI, Flask, React, Angular, data modeling, event-driven architectures.

Certifications & Education – MSc in Data Analytics, IELTS Academic (Band 7/9), Full Stack Java Spring Boot & Angular, Web Development (UC Davis), Python Programming (University of Michigan).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Java Application Production Support & Observability (HCL Technologies)

- Managed **production support** for mission-critical **Java and .NET applications**, implementing **real-time monitoring** dashboards using **Splunk, CloudWatch, and Dynatrace** to track application health, SLA metrics, and incident trends.
- Developed **Python automation scripts** to streamline incident response workflows, generating automated alerts and remediation reports; reduced manual intervention time by enabling **proactive alerting** and rapid root-cause analysis through log aggregation and metric correlation.
- Built and optimized **SQL queries** for data validation and troubleshooting, supporting rapid diagnosis of production issues; collaborated with platform teams to design resilient error-handling patterns and documented runbooks for reliability engineering practices.

Microservices Deployment & CI/CD Automation Pipeline (HCL Technologies)

- Architected and deployed **Spring Boot microservices** across **AWS infrastructure (EC2, S3, Lambda)**, containerized with **Docker**, and orchestrated via **Jenkins CI/CD pipelines** with automated testing and code quality gates.
- Implemented infrastructure-as-code practices using **Git version control** and branching strategies, enabling **automated builds and deployments** with **~40% reduction** in deployment time; designed secure credential and secret management patterns for compliance with enterprise security standards.
- Established comprehensive **observability** for microservices including structured logging, performance metrics, and distributed traces; created operational dashboards for reliability monitoring and performance tuning, supporting end-to-end feature delivery and incident investigation.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
