PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **data pipelines** and **ETL workflows** using **Python** to ingest, validate, and transform large-scale operational data from multiple sources; created automated reporting systems with KPIs for stakeholder review, directly supporting data-driven decision-making across enterprise systems.
- Performed **reliability engineering** and **SLA management** on production enterprise applications using **Splunk, CloudWatch, and Dynatrace**; analysed system logs and metrics to identify root causes of failures, troubleshoot issues, and implement preventative improvements, maintaining **99.5%+ uptime** on critical services.
- Executed **SQL queries** against **Oracle, PostgreSQL, and MySQL** databases to extract, validate, and analyse large datasets; performed schema modifications and ad-hoc data validation to support operational reporting and system accuracy verification.
- Developed **REST APIs** and microservices using **Java Spring Boot** for data integration and system interoperability; containerised applications with **Docker** and deployed to **AWS (EC2, S3, Lambda)** environments, improving deployment consistency and scalability.
- Collaborated with cross-functional teams in **Agile/Scrum** environments; documented processes and system designs in **Confluence**, managed defect tracking and project workflow in **Jira**, and participated in code reviews to ensure quality standards.
- Automated infrastructure monitoring and routine maintenance tasks using **Linux shell scripting, cron jobs, and CI/CD pipelines (Jenkins)**; reduced manual operational overhead by **40%** through intelligent automation and improved system observability.

SKILLS

Data Engineering & Analytics – Python, pandas, NumPy, ETL pipelines, data validation, SQL query optimisation, reporting and KPI development.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, CI/CD (Jenkins), Git.

Databases – Oracle, PostgreSQL, MySQL, schema design, data integrity.

Backend Development – Java, Spring Boot, REST APIs, microservices.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, incident response.

Collaboration & Process – Jira, Confluence, Agile/Scrum, technical documentation, stakeholder communication.

Academic Credentials – MSc Data Analytics, Bachelor of Engineering (Computer Science).

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Enterprise Data Pipeline & Reporting Automation (HCL Technologies)

- Architected and deployed an end-to-end **Python-based ETL pipeline** to integrate operational data from **SAP, Oracle, and cloud data sources** into a centralised data warehouse; automated daily load and validation processes.
- Developed **SQL-driven reporting system** with dynamic KPI dashboards for executive stakeholder review; reduced manual report generation time by **60%** and improved data accuracy through automated validation rules.
- Monitored pipeline health and data quality using **CloudWatch and custom Python monitoring scripts**; identified anomalies, investigated root causes, and implemented corrective actions to maintain **99.8% data accuracy**.

Microservice Deployment & System Integration (HCL Technologies)

- Developed and tested **Java Spring Boot microservices** that integrated load/customer data from multiple operational systems; ensured seamless data interoperability between legacy and modern platforms.
- Containerised application stack using **Docker** and deployed to **AWS EC2 and Lambda** with automated **Jenkins CI/CD pipelines**; improved deployment frequency from quarterly to weekly releases.
- Collaborated with data analytics and operations teams to validate system output accuracy; performed root cause analysis on integration failures and documented technical solutions in **Confluence** for cross-team knowledge sharing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
