PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Partnered with business and development teams to analyse enterprise application requirements, translating complex stakeholder needs into **user stories** and **acceptance criteria** using **Jira** and **Confluence** artefacts including process flows and functional specifications.
- Managed product backlogs and assisted in quarterly planning cycles, leading **story refinement sessions** and applying **Acceptance Test-Driven Development (ATDD)** principles to ensure sprint-ready deliverables across **Agile/Scrum** environments.
- Conducted end-to-end testing and validation activities on Java Spring Boot and .NET services, interpreting **data models** and writing **SQL queries** against **PostgreSQL, MySQL, and Oracle** databases to verify functional requirements and test coverage.
- Owned **P1/P2 incident response** and production support for critical enterprise systems, using **Splunk, CloudWatch, and Dynatrace** for monitoring and analysis—demonstrating strong understanding of application architecture and reliability engineering practices.
- Developed and executed **Python automation scripts** and **ETL data pipelines** to streamline manual testing processes and reporting workflows, reducing operational overhead by approximately **20%**.
- Collaborated effectively within global, distributed cross-functional teams, delivering solutions across **AWS infrastructure (EC2, S3, Lambda), Docker containerisation, and CI/CD pipelines (Jenkins)** while maintaining strong written and verbal communication with stakeholders.

SKILLS

Requirements & Analysis – User Stories, Acceptance Criteria, Business Requirements Documents, Process Flows, Use Cases, ATDD.

Data & SQL – SQL querying and analysis, PostgreSQL, MySQL, Oracle, data model interpretation, schema analysis.

Agile & Delivery – Jira, Confluence, Scrum ceremonies, Sprint planning, Backlog management, Story refinement.

Testing & Quality Assurance – Acceptance testing, End-to-end validation, Test planning, Automated and manual testing.

Technology & Architecture – Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, Production support, Incident response.

Scripting & Automation – Python, Shell scripting, ETL pipelines, Data pipeline development, CI/CD (Jenkins).

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Java Application Modernisation & User Story Development (HCL Technologies)

- Collaborated with business stakeholders to document functional and non-functional requirements, creating detailed **business requirement documents** and **process flow diagrams** that informed feature prioritisation and sprint planning.
- Converted complex requirements into **user stories with clear acceptance criteria**, led refinement sessions to ensure stories were sprint-ready, and applied **ATDD principles** to define testable acceptance conditions.
- Partnered with development team to deliver **Java Spring Boot REST APIs** and performed **SQL-based data validation** against **PostgreSQL databases**, signing off on deliverables through end-to-end functional testing and validation activities.

Production Support & Data Pipeline Reliability Engineering (HCL Technologies)

- Owned **P1/P2 incident response** and SLA management for critical enterprise systems, using **Splunk and Dynatrace** to investigate root causes, analyse application behaviour, and identify system improvement opportunities.
- Developed **Python automation scripts** and scheduled **ETL data pipelines** to replace manual testing and reporting processes, streamlining operational workflows and reducing support overhead.
- Demonstrated deep understanding of application architecture across **AWS infrastructure (EC2, S3, Lambda, CloudWatch)**, **Docker containers**, and **CI/CD pipelines (Jenkins)**, supporting the development team with technical analysis and troubleshooting.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
