+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted **production monitoring and incident response** for enterprise applications using **Splunk, CloudWatch, and Dynatrace**, managing **P1/P2 escalations** and maintaining **SLA compliance** — directly applicable to financial crime risk assessment and escalation workflows.
- Developed **Python automation scripts** for data pipelines, ETL workflows, and **scheduled reporting**, enabling rapid analysis of large datasets — transferable to gathering and analyzing information from internal systems and third-party data sources for EDD investigations.
- Executed **SQL queries** across **PostgreSQL, MySQL, and Oracle** for ad-hoc data validation and schema analysis, identifying patterns and anomalies in complex datasets — core competency for evaluating transactional activity and detecting unusual patterns.
- Built and maintained **REST APIs** using **Java Spring Boot**, with focus on robust code quality, security, and cross-functional collaboration through **code reviews and Git workflows** — demonstrates ability to work with internal systems and collaborate across teams.
- Served as a **reliability engineer** owning application health and incident resolution, documenting findings in ticketing systems (**Jira**) and communicating status to stakeholders — directly parallels escalation, documentation, and stakeholder communication in EDD role.
- Completed **MSc in Data Analytics**, with advanced training in statistical analysis, data investigation methodologies, and evidence-based decision-making — supports expertise in complex case analysis and risk assessment frameworks.

SKILLS

Financial Crime & Compliance – production risk management, incident escalation, anomaly detection, complex case analysis.

Data Analysis & Investigation – SQL, Python, pattern recognition, data validation, ad-hoc reporting, open-source intelligence gathering.

Systems & Tools – Splunk, CloudWatch, Dynatrace, Jira, internal case management systems, third-party data platforms.

Documentation & Communication – technical writing, case documentation, stakeholder communication, audit-ready reporting.

Cross-Functional Collaboration – working with payments, legal, compliance, and customer care teams, escalation management.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git.

Programming Languages – Python, Java, SQL, REST API development, Flask, FastAPI.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

PROJECTS

Enterprise Application Monitoring & Incident Response (HCL Technologies)

- Established and monitored **alert thresholds** across **Splunk and CloudWatch** for **15+ production services**, reducing mean time to resolution (MTTR) by **35%** through proactive anomaly detection.
- Conducted root cause analysis on **P1/P2 incidents**, documenting findings and recommendations in **Jira** with clear evidence trails for audit and stakeholder review — directly parallels EDD case documentation requirements.
- Collaborated with development, payments, and infrastructure teams to implement corrective actions and process improvements, ensuring service reliability and risk mitigation.

Data Pipeline & Automated Reporting System (HCL Technologies)

- Designed and deployed **Python ETL pipelines** that extracted data from **Oracle and PostgreSQL**, identified anomalies in transactional datasets, and generated **weekly compliance reports** for senior stakeholders.
- Built **automated data validation** workflows using **pandas and NumPy** to flag irregular patterns and suspicious activity, supporting risk assessment and investigative decision-making.
- Maintained comprehensive documentation and dashboards in **Confluence**, enabling scalability and knowledge transfer across the team.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
