PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **enterprise infrastructure reliability engineering** across **Java/.NET applications** using **AWS** (EC2, S3, Lambda, CloudWatch) and monitoring platforms (**Splunk, Dynatrace**), managing **SLA compliance** and P1/P2 incident response for production environments
- Architected and implemented **containerization solutions** using **Docker** to modernize legacy application deployments; designed **CI/CD pipelines** in **Jenkins** integrated with **Git** branching strategies, reducing deployment friction and enabling faster infrastructure iteration
- Guided technical assessments and data modernization strategies by developing **Python ETL pipelines** and **SQL** optimization across **PostgreSQL, MySQL, and Oracle** environments, translating infrastructure requirements into actionable roadmaps for **3+ enterprise clients**
- Prototyped and demonstrated **REST API integrations** and application infrastructure solutions using **Spring Boot**, supporting proof-of-concept work and technical advocacy with stakeholders to resolve infrastructure modernization blockers
- Developed automation and infrastructure-as-code practices through **Python scripting, Linux** shell automation, and scheduled reporting; reduced operational overhead by **40%** through intelligent monitoring and alerting strategy implementation
- Collaborated cross-functionally with product and platform teams on **cloud infrastructure strategy**, presenting technical recommendations on distributed systems architecture, application deployment patterns, and enterprise modernization approaches to business and technical audiences

SKILLS

Cloud Infrastructure & Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, virtualization fundamentals, infrastructure reliability engineering.

Application Development & APIs – Java Spring Boot, REST APIs, Python, Flask, FastAPI.

Data & Database Technologies – SQL, PostgreSQL, MySQL, Oracle, Python data pipelines, ETL, pandas, NumPy.

DevOps & Tooling – Jenkins, CI/CD, Git, Linux, shell scripting, infrastructure automation.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, production support.

Enterprise & Collaboration – Jira, Confluence, Agile/Scrum, technical presentations, stakeholder communication.

Education – MSc Data Analytics (National College of Ireland), Bachelor of Engineering Computer Science (SNS College of Technology).

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Application Modernization & Cloud Migration (HCL Technologies)

- Led infrastructure reliability and monitoring design for **Java microservices migration** to **AWS**, establishing **CloudWatch** dashboards, **Dynatrace** instrumentation, and SLA-driven alerting to achieve **99.5% uptime** for production workloads
- Architected **Docker containerization strategy** for legacy .NET and Java applications, creating standardized deployment templates and **Jenkins-based CI/CD pipelines** that reduced infrastructure provisioning time by **50%**
- Conducted technical assessments of existing on-premises infrastructure and delivered modernization roadmaps recommending cloud-native patterns, container orchestration approaches, and application restructuring priorities to C-level stakeholders

Data Pipeline & ETL Infrastructure Engineering (HCL Technologies)

- Designed and deployed **Python-based ETL pipelines** connecting multiple data sources across distributed systems, utilizing **pandas** and **NumPy** to process **50GB+ monthly datasets** with **99.8% accuracy**
- Optimized **SQL queries** and **database schemas** across **PostgreSQL**, **MySQL**, and **Oracle** environments; improved query performance by **35%** through indexing strategy and execution plan analysis
- Built automated **Linux cron-based scheduling** and **Python automation scripts** to support continuous data validation and infrastructure monitoring, reducing manual operational effort and improving reliability across enterprise data platforms

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
