PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **ETL data pipelines** using **Python** (pandas, NumPy) and **SQL** (PostgreSQL, MySQL, Oracle) to extract, transform, and load enterprise data; automated scheduled reporting reducing manual effort by **40%** and improving data accuracy for stakeholder consumption.
- Built and maintained **REST APIs** and microservices using **Java Spring Boot**, integrating with **AWS** services (**EC2, S3, Lambda, CloudWatch**) to support reliable, scalable data ingestion and processing workflows across distributed systems.
- Optimized **data models** and schema design across **PostgreSQL, MySQL, and Oracle** databases; performed exploratory queries and data validation to ensure data quality and single source of truth for analytics teams.
- Implemented **CI/CD pipelines** using **Jenkins** and **Git**; containerized data applications with **Docker** to enable consistent, reproducible deployments and accelerate time-to-production for data solutions.
- Partnered with cross-functional stakeholders (business analysts, product teams) to translate analytics requirements into actionable technical solutions; managed SLA-driven incident response and production support for enterprise applications using **Splunk, CloudWatch, and Dynatrace**.
- Authored technical documentation and design specifications; conducted code reviews to advocate data quality and maintainability; leveraged **Linux** shell scripting and log analysis to diagnose and resolve complex data pipeline issues in production environments.

SKILLS

Data Engineering & Pipelines – ETL/ELT design and development, data pipeline architecture, dimensional data modeling, SQL query optimization, data validation.

Programming Languages – Python, Java, SQL, Shell scripting.

Databases & Data Infrastructure – PostgreSQL, MySQL, Oracle, AWS (EC2, S3, Lambda, CloudWatch), Docker, distributed data systems.

Data Processing & Analytics – pandas, NumPy, exploratory data analysis, ad-hoc querying, schema design, data quality management.

Cloud & DevOps – AWS services, Docker containerization, Jenkins CI/CD, Git version control, Linux administration.

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Agile/Scrum methodologies.

Web Frameworks – Spring Boot, REST API development, Flask, FastAPI.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Data Pipeline & Monitoring Architecture (HCL Technologies)

- Designed and implemented end-to-end **ETL pipelines** using **Python** and **SQL** to ingest, transform, and aggregate structured data from multiple enterprise sources into a centralized data warehouse on **AWS S3** and **PostgreSQL**.
- Built data quality validation frameworks and automated data profiling scripts to ensure schema consistency and data integrity across all ingestion layers; integrated **CloudWatch** and **Splunk** for real-time pipeline monitoring and alerting.
- Deployed **Lambda**-based scheduled jobs and **Java Spring Boot** microservices to handle asynchronous data processing; containerized applications with **Docker** and orchestrated deployments via **Jenkins CI/CD pipelines**, reducing deployment time by **35%**.

Exploratory Data Analysis & Reporting Infrastructure (HCL Technologies)

- Conducted exploratory queries and dimensional data modeling across **Oracle, MySQL, and PostgreSQL** databases to identify data insights and establish reporting requirements for business stakeholders.
- Developed automated reporting solutions using **Python** (pandas, NumPy) to generate dashboards and reports from complex, multi-source datasets; reduced manual reporting effort by **50%** using scheduled cron jobs and **Lambda** triggers.
- Collaborated with data analysts and business teams to translate evolving analytics needs into optimized **data models** and efficient SQL queries; documented technical specifications and maintained code quality through peer reviews and **Git** branching strategies.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
