PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Administered and monitored enterprise applications using **cloud monitoring tools (CloudWatch, Dynatrace, Splunk)**, managing SLAs and responding to P1/P2 incidents with **99%+ uptime** focus; directly transferable to Microsoft 365, SharePoint Online, and Power Platform administration and governance.
- Designed and implemented **automated workflows** using **Python** scripting and scheduled jobs for data pipelines and ETL processes, demonstrating capability to build **Power Automate** solutions and drive digital transformation through automation.
- Configured and optimised **cloud infrastructure** on **AWS (EC2, S3, Lambda, CloudWatch)**, applying security best practices and access governance principles that align with Microsoft Dynamics, SharePoint, and Teams administration requirements.
- Performed **SQL data validation** and schema management across **PostgreSQL, MySQL, and Oracle** databases; developed proficiency in data governance, permissions auditing, and integrity checks applicable to **Dataverse** and SharePoint information architecture.
- Collaborated cross-functionally with development and operations teams in **Agile/Scrum** environments, clarifying requirements and delivering solutions; experienced in user support, training delivery, and continuous improvement practices.
- Deployed containerised applications using **Docker** and managed **CI/CD pipelines** via **Jenkins** and **Git**, demonstrating technical depth in systems administration, configuration management, and integration—skills essential for supporting Microsoft cloud solutions at scale.

SKILLS

Microsoft Cloud & Administration – Microsoft 365, SharePoint Online, Microsoft Teams, OneDrive, Azure fundamentals, cloud governance.

Power Platform & Automation – Power Automate workflow design, business process automation, low-code solution development.

Cloud Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD pipelines, Linux administration.

Data Management & Governance – SQL (PostgreSQL, MySQL, Oracle), data validation, schema design, permissions auditing, access governance.

Monitoring & Security – Splunk, Dynatrace, CloudWatch, SLA management, incident response, security best practices.

Programming & Scripting – Python, Java, Spring Boot, REST APIs, shell scripting, automation.

Collaboration & Tools – Jira, Confluence, Agile/Scrum, user support, requirements gathering, training delivery.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Application Monitoring & Incident Response (HCL Technologies)

- Established **monitoring and alerting frameworks** using **Splunk**, **Dynatrace**, and **CloudWatch** for mission-critical Java/.NET applications, ensuring **SLA compliance** and rapid P1/P2 incident resolution.
- Implemented **governance and access controls** across monitored systems, applying security best practices and regular audits to minimise oversharing and unintended access—directly applicable to SharePoint permissions management and Microsoft 365 governance.
- Automated incident tracking, escalation, and reporting via **Python** scripts and **cron jobs**, reducing manual overhead and improving visibility; foundation for **Power Automate** workflow development and continuous improvement initiatives.

Cloud Infrastructure & Data Pipeline Automation (HCL Technologies)

- Designed and deployed **AWS-based infrastructure (EC2, S3, Lambda)** for scheduled data pipelines and ETL workflows, applying **infrastructure-as-code** and security governance principles.
- Developed **Python**-based automation scripts for data validation, transformation, and reporting; configured **SQL** queries across **PostgreSQL**, **MySQL**, and **Oracle** to ensure data integrity and governance compliance.
- Collaborated with cross-functional teams to clarify requirements and optimise system performance; managed **CI/CD pipelines** via **Jenkins** and **Git**, demonstrating capability to integrate disparate systems and support enterprise-scale digital transformation initiatives.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
