PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analyzed and distilled **large operational and financial data sets** using **Python, pandas**, and **SQL** to support cross-functional decision-making; created automated **ETL pipelines** and scheduled reports for stakeholder visibility, reducing manual reporting effort by **40%**.
- Supported financial and operational control through **production monitoring and SLA management** of enterprise applications using **Splunk, CloudWatch, and Dynatrace**; coordinated P1/P2 incident response across teams to minimize service disruption and maintain accountability.
- Collaborated with operational and business teams to **model costs, validate assumptions, and coordinate resource allocation** for project delivery; prepared detailed cost breakdowns and financial summaries for internal and external stakeholder review.
- Developed and maintained **automated data validation workflows** and **schema management** in **PostgreSQL, MySQL, and Oracle** to ensure accuracy and integrity of financial and operational datasets; created ad-hoc queries and reports to support financial analysis.
- Managed **CI/CD pipelines using Jenkins and Git**; participated in code reviews and Agile ceremonies to ensure quality and alignment with business requirements; maintained detailed documentation in **Confluence** for process transparency.
- Demonstrated strong attention to detail and problem-solving mindset by identifying process inefficiencies, proposing improvements, and implementing solutions; met tight deadlines while managing multiple concurrent deliverables in fast-paced environments.

SKILLS

Financial & Data Analysis – cost modelling, budget preparation, financial data analysis, data validation, proposal support.

Data Engineering & Automation – Python, ETL pipelines, SQL, pandas, NumPy, automated reporting, data quality assurance.

Databases – PostgreSQL, MySQL, Oracle, schema management, ad-hoc query development.

Tools & Platforms – Splunk, Dynatrace, CloudWatch, Jenkins, Git, Jira, Confluence, Microsoft Office.

Cloud & Infrastructure – AWS (EC2, S3, Lambda), Docker, Linux, shell scripting.

Cross-Functional Collaboration – stakeholder engagement, process improvement, team coordination, Agile/Scrum.

Qualifications – MSc in Data Analytics (National College of Ireland), Bachelor of Engineering in Computer Science.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Application Monitoring & Financial SLA Management (HCL Technologies)

- Established monitoring and alerting framework using **Splunk and Dynatrace** for enterprise Java and .NET applications; tracked SLA compliance and P1/P2 incident response metrics across multiple production systems.
- Automated incident reporting and escalation workflows using **Python scripting** to reduce manual handoffs; coordinated with operations teams to resolve critical issues and maintain service availability.
- Created financial impact analysis reports correlating service downtime with business cost; provided stakeholders with actionable insights to prioritize infrastructure improvements.

Operational Data Pipeline & Cost Reporting System (HCL Technologies)

- Designed and deployed **ETL pipelines using Python, pandas, and SQL** to consolidate operational and resource cost data from multiple sources into a centralized **PostgreSQL** warehouse.
- Developed automated monthly reporting suite that aggregated costs by business unit, project, and service; reduced report generation time from **8 hours to 2 hours** and improved data accuracy.
- Collaborated with Finance and Operations teams to validate cost assumptions, reconcile datasets, and ensure alignment with budget forecasts; presented findings in clear, non-technical summaries for stakeholder consumption.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
