PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **automated monitoring and validation frameworks** for enterprise Java/.NET applications using **Splunk, CloudWatch, and Dynatrace**, enabling rapid detection of system anomalies and reducing incident response time by **30%** through real-time observability and SLA management.
- Developed **Python**-based data pipelines and **ETL scripts** for automated testing, validation, and scheduled reporting across distributed systems; demonstrated strong problem-solving skills in identifying data inconsistencies and implementing corrective logic.
- Built and maintained **REST APIs and microservices** using **Java Spring Boot** with rigorous testing practices including unit tests and integration validation; collaborated across diverse teams (design, QA, operations) in Agile environments to deliver high-quality, reliable features.
- Implemented **CI/CD pipelines using Jenkins** and **Git** with automated test execution and code review workflows; established and maintained infrastructure-as-code practices using **Docker** containerisation and **AWS services (EC2, S3, Lambda, CloudWatch)**.
- Performed advanced **SQL query optimisation and data validation** across **PostgreSQL, MySQL, and Oracle** databases; executed schema changes and ad-hoc analysis to support feature development and production troubleshooting in fast-paced environments.
- Demonstrated self-starter mentality and adaptability by rapidly acquiring skills across multiple domains (cloud infrastructure, scripting, monitoring tools) and applying them to solve complex reliability and data engineering challenges in a large-scale enterprise setting.

SKILLS

Programming Languages – Python, Java, SQL, Shell scripting.

Verification & Testing – Test automation, functional validation, data validation, test case design, automated test generators.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins CI/CD.

Databases – PostgreSQL, MySQL, Oracle, data pipeline design.

Frameworks & Tools – Spring Boot, REST APIs, Git, Jira, Confluence, pandas, NumPy.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, incident response.

Soft Skills – Team collaboration, Agile/Scrum methodologies, problem-solving, communication.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Monitoring & Reliability Engineering (HCL Technologies)

- Led design and deployment of comprehensive **monitoring and validation framework** for mission-critical enterprise Java/.NET applications serving high-volume transaction processing; integrated **Splunk, CloudWatch, and Dynatrace** for unified observability across distributed infrastructure.
- Developed automated **alert escalation logic and SLA tracking** for P1/P2 incident response; established data-driven thresholds and scoreboards to track system health metrics, reducing mean time to recovery (MTTR) by **30%** through proactive anomaly detection.
- Implemented **Python-based automation scripts** for routine validation checks and constraint verification; created self-healing mechanisms and automated remediation workflows that decreased manual intervention by **40%** during production incidents.

Data Engineering & Test Automation Pipeline (HCL Technologies)

- Architected end-to-end **Python ETL pipeline** with **pandas and NumPy** for automated data validation, transformation, and scheduled reporting across multiple enterprise databases (**PostgreSQL, MySQL, Oracle**); integrated functional constraints and quality checkers to ensure data integrity.
- Designed and implemented **random test generators and functional validation models** using **Python Flask/FastAPI** for dynamic payload generation and schema validation; achieved **95%+ test coverage** of business logic through comprehensive test case planning.
- Established **CI/CD pipeline using Jenkins, Git, and Docker** with automated test execution, coverage reporting, and artifact deployment; enabled continuous validation of data pipeline changes across staging and production environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
