PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **end-to-end data pipelines** using **Python**, **SQL**, and **ETL frameworks** to extract, transform, and structure enterprise data from multiple sources; automated **data cleaning** including deduplication and normalization, reducing manual processing by **40%**.
- Built **production-ready automation workflows** using **Python** scripting and **REST APIs** to integrate disparate systems; developed **scheduled automation jobs** via cron and Jenkins pipelines, ensuring reliable data synchronization and system reliability across SLA-critical operations.
- Implemented **data enrichment and validation logic** using **pandas** and **SQL** to improve data quality; designed **fuzzy matching** and entity resolution processes for lead deduplication, resulting in cleaner, actionable datasets ready for downstream integration.
- Developed and optimized **database queries** across **PostgreSQL**, **MySQL**, and **Oracle**; managed **schema changes** and data migrations supporting automation platforms, ensuring scalability and performance under high-volume data ingestion scenarios.
- Deployed **containerized automation services** using **Docker** and **AWS (EC2, Lambda, S3)**; configured **CloudWatch monitoring** and **alerting** to ensure system performance, accuracy, and reliability of production automation workflows.
- Collaborated with cross-functional teams to translate business requirements into technical automation solutions; identified and prioritized high-impact workflow optimization opportunities through incident analysis and monitoring dashboards, demonstrating strong problem-solving and technical ownership.

SKILLS

AI & Automation – automation workflows, data pipeline design, system integration, workflow orchestration.

Programming & Scripting – Python, Java, shell scripting, REST API development.

Data Engineering – ETL, data transformation, data cleaning, deduplication, enrichment, fuzzy matching, entity resolution, pandas, NumPy.

Databases & Data Processing – PostgreSQL, MySQL, Oracle, SQL, ad-hoc querying, schema management.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, production support.

Tools & Frameworks – Spring Boot, Flask, FastAPI, Jira, Confluence, Agile/Scrum.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Data Pipeline & Automation Framework (HCL Technologies)

- Architected and built an **end-to-end Python-based data pipeline** to extract structured data from multiple enterprise sources; integrated **SQL data validation** and **deduplication logic** to ensure data quality and consistency.
- Deployed **automated ETL workflows** using **scheduled Python jobs** and **Jenkins CI/CD pipelines** to transform raw inputs into CRM-ready datasets; reduced manual data processing overhead by automating **data enrichment** and normalization tasks.
- Integrated automation outputs with backend **Java Spring Boot** microservices via **REST APIs**; configured **CloudWatch monitoring** and **alerting** to track pipeline performance and data accuracy across production environments.

Production Monitoring & Intelligent Alert System (HCL Technologies)

- Implemented **advanced monitoring dashboards** using **Splunk and Dynatrace** to track system health across enterprise Java/.NET applications; developed **automated alerting logic** to identify and prioritize high-impact issues, improving P1/P2 incident response time.
- Built **Python-based data transformation scripts** to correlate monitoring signals from multiple sources; created **structured reporting pipelines** that converted raw log and metric data into actionable intelligence for operations teams.
- Collaborated with infrastructure and development teams to identify automation opportunities; translated monitoring insights into **automation-driven remediation workflows**, reducing manual intervention for recurring operational issues.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
