

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **production-grade Java Spring Boot** REST APIs and microservices for enterprise HR and financial applications, ensuring **99.5% uptime SLA** through rigorous testing, code reviews, and secure coding practices including authentication/authorization patterns and input validation.
- Architected and maintained **full-stack capabilities** across backend services and frontend integrations using **Java, Spring Boot, React, and Angular**, delivering responsive user experiences and reliable API integrations for mission-critical systems serving thousands of users.
- Executed **system design** and troubleshooting across distributed microservices architectures, leveraging **AWS (EC2, S3, Lambda, CloudWatch)** for deployment, observability, and operational stability in large-scale enterprise environments; diagnosed and resolved **P1/P2 incidents** using **Splunk, Dynatrace**, and structured logging.
- Optimized **SQL queries and schema design** across **PostgreSQL, MySQL, and Oracle** databases; developed **Python ETL pipelines and data workflows** using **pandas and NumPy** for analytics and continuous improvement reporting, enabling data-driven architectural decisions.
- Implemented **CI/CD pipelines using Jenkins** with **Docker containerization**, Git branching strategies, and Agile/Scrum ceremonies; contributed to DevOps automation through **shell scripting, Linux administration**, and deployment orchestration in corporate cloud environments.
- Proactively identified performance patterns and technical debt through code analysis and monitoring insights; mentored junior engineers on application resiliency, secure development practices, and SDLC best practices; actively participated in engineering communities exploring emerging technologies.

SKILLS

Programming Languages – Java, Python, JavaScript/TypeScript.

Backend & Frameworks – Spring Boot, REST APIs, Microservices Architecture, API Design.

Frontend & Full-Stack – React, Angular, Responsive UI Development.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, CI/CD (Jenkins).

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL Optimization, ETL, pandas, NumPy.

DevOps & Observability – Splunk, Dynatrace, Git, Jira, Application Monitoring, Shell Scripting.

Enterprise & Architecture – System Design, SDLC, Agile/Scrum, Security (Authentication/Authorization), Code Quality.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise HR Platform Reliability Engineering (HCL Technologies)

- Owned production support and **operational stability** of **Spring Boot microservices** supporting 500+ concurrent HR platform users; reduced MTTR by **40%** through proactive monitoring dashboards in **CloudWatch and Dynatrace**, implementing structured logging and alerting patterns.
- Designed and deployed **Java REST APIs** for payroll and benefits integrations; executed **system design** reviews ensuring scalability, security (authentication/authorization), and **SQL query optimization** across **Oracle and PostgreSQL** databases.
- Developed **Python automation scripts** for incident response workflows, log analysis, and periodic health checks using **cron jobs and shell scripting** on **Linux** servers, reducing manual operational overhead by **35%**.

Full-Stack Data Pipeline & Analytics Application (HCL Technologies)

- Built end-to-end **ETL pipelines using Python** (pandas, NumPy) to process large, diverse datasets from multiple sources; created **REST APIs** in **Spring Boot** to expose analytics data, supporting business intelligence and continuous improvement initiatives.
- Implemented **Docker containerization** and **Jenkins CI/CD pipelines** for automated deployment across **AWS (EC2, Lambda)** environments, enabling reliable and repeatable application releases in corporate cloud infrastructure.
- Designed responsive **React** frontend dashboards for data visualization and reporting; integrated with backend **Java microservices**, ensuring secure API communication and high-performance data retrieval for analytics teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
