+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted **financial & performance analysis** on enterprise Java/.NET applications using **Splunk, CloudWatch, Dynatrace**, monitoring SLA compliance and P1/P2 incident response to ensure **99.5%+ uptime** across production systems serving multiple business units.
- Developed **Python-based ETL pipelines and data automation scripts** for financial reporting and ad-hoc data validation, processing **500K+ daily transactions** across PostgreSQL, MySQL, and Oracle databases to support portfolio risk assessments.
- Built **REST APIs and microservices** using **Java Spring Boot**, implementing secure authentication, error handling, and data serialization to integrate disparate systems and enable real-time data exchange for stakeholder reporting.
- Performed **risk assessment and anomaly detection** on application logs and metrics, identifying performance bottlenecks and security vulnerabilities using **Linux shell scripting** and log analysis techniques; documented findings in **Jira** and escalated critical issues with business impact quantification.
- Automated infrastructure monitoring and **AWS deployment pipelines** using **Jenkins CI/CD** and **Docker containerization**, reducing manual deployment time by **40%** and enabling rapid iteration on feature releases and hotfixes.
- Collaborated with cross-functional teams in Agile/Scrum ceremonies, performing code reviews on **Git** repositories and documenting technical specifications in **Confluence**; demonstrated strong analytical and communication skills across senior and junior stakeholders.

SKILLS

Financial Analysis & Modelling – Financial statement evaluation, data-driven risk assessment, valuation methodologies, sensitivity analysis.

Data Analysis & Engineering – Python, pandas, NumPy, ETL pipelines, SQL (PostgreSQL, MySQL, Oracle), ad-hoc querying, data validation.

Backend Development – Java Spring Boot, REST APIs, microservices architecture, application development and bug remediation.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, CI/CD (Jenkins), Git.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, log analysis.

Tools & Collaboration – Jira, Confluence, Agile/Scrum, code reviews, stakeholder communication.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Application Monitoring & Reliability Engineering (HCL Technologies)

- Owned production support responsibilities for **15+ enterprise Java/.NET applications**, leveraging **Splunk, Dynatrace, and CloudWatch** to monitor system health, detect anomalies, and respond to P1/P2 incidents within SLA windows.
- Developed **automated alerting rules and custom dashboards** that reduced mean-time-to-detection (MTTD) by **35%**, enabling faster root-cause analysis and issue resolution.
- Collaborated with application teams to implement **performance optimization strategies**, including database query tuning in **Oracle and PostgreSQL**, resulting in **25% improvement** in application response times.

Data Pipeline Automation & Portfolio Reporting (HCL Technologies)

- Designed and deployed **Python-based ETL pipelines** using **pandas and NumPy** to consolidate financial and operational data from multiple sources, enabling automated weekly and monthly reporting to business stakeholders.
- Built **REST API connectors** using **Java Spring Boot** and **FastAPI** to integrate portfolio data with downstream analytics systems, ensuring data consistency across **165+ portfolio entities** and reducing manual data reconciliation by **60%**.
- Automated infrastructure deployment using **Jenkins CI/CD pipelines, Docker containerization, and AWS Lambda**, enabling on-demand scaling and reducing deployment time from **2 hours to 15 minutes**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
