+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Owned **production support & SLA management** for enterprise **Java/.NET applications** across **AWS** infrastructure, triaging and resolving **P1/P2 incidents** using **Splunk, CloudWatch, and Dynatrace** — reducing mean time to resolution by proactive log analysis and root-cause investigation.
- Investigated and resolved data integrity issues by writing **SQL queries** against **PostgreSQL, MySQL, and Oracle** databases, validating schema changes and executing safe data corrections in production environments under SLA constraints.
- Reproduced integration and application failures in lower environments, leveraging **Linux shell scripting, log analysis, and Docker** containerisation to identify root causes and propose targeted fixes or escalations with clear context to engineering teams.
- Served as technical liaison between monitoring systems and engineering by managing **Jira ticketing, Confluence documentation, and Agile ceremonies**, ensuring customer-impacting issues were communicated clearly and tracked through resolution.
- Automated recurring support workflows using **Python scripting** for data validation, ETL pipelines, and **scheduled reporting**, reducing manual triage overhead and enabling faster issue detection and diagnosis.
- Contributed to operational runbooks and post-incident reviews, documenting recurring issues and systemic patterns to inform product and engineering prioritisation; participated in **CI/CD governance** via **Jenkins pipelines** and **Git code reviews**.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux.

Incident Triage & Monitoring – Splunk, Dynatrace, SLA management, P1/P2 incident response, log analysis.

Database & Data Investigation – SQL (PostgreSQL, MySQL, Oracle), data validation, schema changes, ad-hoc querying.

Backend & Integration Support – Java Spring Boot, REST APIs, Python scripting, ETL, Flask, FastAPI.

DevOps & Collaboration – Jenkins, Git, Jira, Confluence, Agile/Scrum, shell scripting, cron jobs.

Analytics & Data Tools – pandas, NumPy, data pipeline automation, scheduled reporting.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Production Monitoring & Incident Response (HCL Technologies)

- Managed operational health of multiple enterprise **Java and .NET applications** deployed on **AWS infrastructure**, owning end-to-end triage from customer report through to resolution within defined SLA targets.
- Diagnosed integration failures and data mismatches using **Splunk and Dynatrace** log analysis, **SQL queries** against production databases, and environment reproduction — identifying root causes and proposing safe, scoped fixes or clear escalations to the engineering team.
- Served as technical first responder and primary liaison between customer-facing teams (Jira/Confluence) and backend engineers, maintaining structured issue tracking and proactive status communication to reduce resolution time by ~30%.

Automation & Data Pipeline Engineering (HCL Technologies)

- Built **Python automation scripts** for recurring support tasks, including data validation workflows, **ETL pipelines**, and **scheduled reporting** via cron jobs — eliminating manual triage bottlenecks and enabling faster issue detection.
- Leveraged **Linux shell scripting** and **Docker** to reproduce issues in containerised lower environments, accelerating root-cause analysis and reducing escalation time for complex integration failures.
- Maintained and extended **SQL-based data correction** processes across **PostgreSQL, MySQL, and Oracle** databases, ensuring data integrity in production while documenting patterns for long-term systemic fixes via the engineering backlog.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
