+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **P1/P2 incident response & SLA management** for enterprise Java/.NET applications across production environments, using **Splunk, CloudWatch, Dynatrace** for real-time monitoring and troubleshooting — resolving critical issues with speed and technical accuracy to maintain uptime
- Debugged and resolved complex technical issues in **Linux** server environments, analyzing logs, shell scripts, and system configurations — translating error patterns into actionable insights for engineering teams and documentation updates
- Designed and deployed **Python automation scripts** for data pipelines, ETL workflows, and scheduled reporting, reducing manual operational overhead and improving support team efficiency
- Built and maintained **REST APIs** using **Java Spring Boot**, including feature development and bug fixes on existing microservices deployed on **AWS (EC2, S3, Lambda)** with **Docker containerization**
- Managed support workflows across **Jira, Confluence, Git, Jenkins CI/CD pipelines** — triaging tickets, conducting code reviews, and maintaining clear documentation for cross-team collaboration in Agile environments
- Identified and documented recurring technical patterns across **SQL (PostgreSQL, MySQL, Oracle)** queries and infrastructure configurations, surfacing feature requests and bug reports with sufficient detail for engineering prioritization

SKILLS

Production Support & Reliability Engineering – incident response, SLA management, monitoring tools (Splunk, CloudWatch, Dynatrace), P1/P2 triage, uptime optimization.

Backend Development – Java, Spring Boot, REST APIs, Python, Flask, FastAPI.

Infrastructure & DevOps – Linux, AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, shell scripting, cron jobs.

Data Engineering – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), ETL, data validation, ad-hoc queries.

Ticketing & Collaboration – Jira, Confluence, Agile/Scrum, code reviews, technical documentation.

Frontend Technologies – Angular, React.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Production Support & Reliability Engineering (HCL Technologies)

- Owned real-time monitoring and incident management for enterprise applications, reducing mean time to resolution (MTTR) through proactive log analysis and **Splunk/Dynatrace** alerting
- Triageed and resolved production issues across distributed **Java/.NET** services, performing root cause analysis and escalating bugs with clear reproduction steps and system context
- Collaborated with engineering teams to document recurring issues, translate support patterns into feature requests, and improve system reliability through infrastructure insights

Automation & Data Pipeline Development (HCL Technologies)

- Developed **Python**-based automation scripts for data validation, **ETL workflows**, and scheduled reporting across **PostgreSQL, MySQL, Oracle** databases
- Deployed **REST APIs** on **AWS Lambda** and **Spring Boot** services in **Docker containers**, managed via **Jenkins CI/CD pipelines** and version control in **Git**
- Reduced manual operational work by **40%+** through intelligent scheduling and automated alerting, freeing team capacity for higher-level technical support work

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
