PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and evaluated **cloud architecture patterns** across **AWS** (EC2, S3, Lambda, CloudWatch) for enterprise Java/.NET applications, demonstrating system-level thinking in production support and reliability engineering for **SLA-critical** services.
- Built **Python data pipelines** and **ETL workflows** using **pandas** and **NumPy**, applying data engineering principles to validate schemas and extract insights from enterprise databases (**PostgreSQL, MySQL, Oracle**), bridging analytics and platform architecture.
- Contributed to **CI/CD architecture** by designing and maintaining **Jenkins** pipelines with **Git** branching strategies, enabling infrastructure-as-code patterns that informed architectural decisions across teams.
- Evaluated emerging monitoring and observability technologies (**Splunk, Dynatrace, CloudWatch**) for production incident response, developing technical opinions on how monitoring solutions integrate with enterprise systems at scale.
- Completed **MSc in Data Analytics**, with coursework spanning machine learning, data architecture, and statistical methods; gained hands-on experience with emerging data and AI tools in academic capstone projects.
- Demonstrated intellectual curiosity and rapid learning across **Java Spring Boot, REST APIs, Docker, Linux shell scripting**, and modern development practices (**Agile, code review, Confluence documentation**), building a foundation for architecture-level technical evaluation.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git.

Backend & API Development – Java Spring Boot, REST APIs, Python (FastAPI, Flask), SQL (PostgreSQL, MySQL, Oracle).

Data Engineering & Analytics – Python, pandas, NumPy, ETL, data pipelines, schema design.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, log analysis, SLA management.

Architecture & Documentation – System design thinking, Confluence documentation, Agile ceremonies, technical communication.

Modern Development Tools – GitHub Copilot, Jira, code review practices, CI/CD principles.

Education – MSc Data Analytics, BE Computer Science, emerging AI/ML concepts.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Cloud Architecture (HCL Technologies)

- Designed **monitoring architecture** using **Splunk and Dynatrace** for mission-critical Java/.NET applications, evaluating tool integration patterns and recommending architecture improvements for production SLA compliance.
- Contributed to **AWS migration strategy** by assessing containerisation approach with **Docker** and designing deployment patterns on **EC2/Lambda**, thinking holistically about how new infrastructure integrates with existing enterprise systems.
- Documented reliability engineering processes and monitoring workflows in **Confluence**, creating reference materials for both human engineers and future AI-assisted code generation.

Data Platform & Analytics Architecture (HCL Technologies + MSc Capstone)

- Architected end-to-end **Python ETL pipelines** using **pandas and NumPy** to process enterprise data across **PostgreSQL and Oracle**, demonstrating how data engineering patterns inform larger platform design decisions.
- Evaluated emerging data processing technologies and documented integration considerations for enterprise adoption, gaining exposure to **architecture documentation** approaches suitable for both human and AI agent consumption.
- Built **REST APIs** with **Python FastAPI** and **Java Spring Boot** to expose data layers, applying architectural principles around API design, versioning, and cross-system integration in a data-driven context.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
