PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed production support and reliability engineering for enterprise applications across multiple environments; coordinated incident response (P1/P2), stakeholder communication, and post-incident reviews using **Splunk, CloudWatch, and Dynatrace** monitoring tools to maintain SLA compliance.
- Developed and optimised **Python**-based automation scripts and **ETL data pipelines** for scheduled reporting and data validation; demonstrated ability to translate business requirements into technical solutions and documentation.
- Collaborated with cross-functional teams (developers, QA, project managers) in **Agile/Scrum** environments; actively participated in design reviews, risk assessments, and scope planning using **Jira, Confluence**, and Git-based workflows.
- Designed and delivered **REST APIs** using **Java Spring Boot**; performed code reviews, managed **CI/CD pipelines with Jenkins**, and ensured adherence to coding standards and deployment schedules across multiple project phases.
- Conducted technical assessments of system designs and implementations; identified constructability risks, proposed optimisations, and validated alignment with requirements across **AWS** infrastructure (EC2, S3, Lambda) and containerised environments using **Docker**.
- Executed database design and optimisation activities on **PostgreSQL, MySQL, and Oracle**; performed schema validation, ad-hoc query development, and data integrity checks to support project delivery and compliance requirements.

SKILLS

Programming & Backend Development – Java, Spring Boot, Python, REST APIs, Flask, FastAPI.

Database & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, ETL, pandas, NumPy.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting.

CI/CD & Version Control – Jenkins, Git, code review practices, deployment pipelines.

Monitoring, Logging & Observability – Splunk, Dynatrace, CloudWatch, log analysis.

Project & Team Collaboration – Jira, Confluence, Agile/Scrum, stakeholder communication, risk assessment.

Frontend (Basic) – React, Angular.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Reliability & Incident Management (HCL Technologies)

- Owned production support responsibility for mission-critical Java/.NET applications serving enterprise clients; established robust monitoring frameworks using **Splunk and Dynatrace** to track system health, performance metrics, and SLA compliance.
- Designed and implemented automated **Python**-based alerting and escalation scripts; reduced mean time to incident response (MTIR) by proactively identifying anomalies and coordinating with engineering teams to minimise downtime.
- Developed comprehensive post-incident documentation and root cause analysis reports; presented findings to stakeholders and proposed technical recommendations to prevent recurrence, demonstrating clear communication and risk mitigation skills.

Data Pipeline & API Development Initiative (HCL Technologies)

- Architected end-to-end **ETL pipelines** in **Python** to extract, transform, and load structured data from multiple sources; integrated with **PostgreSQL and MySQL** databases to support real-time reporting and analytics requirements.
- Built and maintained **REST APIs** using **Java Spring Boot**; deployed to **AWS Lambda** and containerised environments with **Docker**; implemented automated testing, **CI/CD with Jenkins**, and version control workflows to ensure code quality and release reliability.
- Collaborated with data engineering and platform teams to optimise query performance, validate data schemas, and align technical implementation with business requirements; documented design decisions and operational procedures for knowledge transfer and handover.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
