PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support and SLA management** for enterprise Java/.NET applications across **3.5 years**, monitoring system health and resolving **P1/P2 incidents** using **Splunk, CloudWatch, and Dynatrace**—building reliability engineering and root cause analysis expertise applicable to supplier quality systems and regulatory compliance.
- Designed and maintained **Python-based data pipelines and ETL workflows** for automated reporting and data validation, demonstrating **data-driven decision-making** capabilities essential for monitoring supplier performance metrics, trends, and quality KPI analysis.
- Authored **SQL queries and schema management** across **PostgreSQL, MySQL, and Oracle** databases to support ad-hoc analysis and compliance reporting, translating complex data into actionable insights for stakeholder communication.
- Led **CI/CD pipeline optimization** using **Jenkins and Git**, implementing code review processes and branching strategies that enforced quality gates—experience directly transferable to managing supplier audit programmes and quality control workflows.
- Developed technical leadership capabilities through **cross-functional Agile collaboration**, supporting incident resolution, process documentation in **Confluence**, and knowledge sharing with junior team members across distributed teams.
- Completed **MSc in Data Analytics** with coursework in statistical analysis, risk assessment, and regulatory frameworks, combined with **Bachelor of Engineering in Computer Science**, providing strong analytical and technical foundation for supplier quality engineering and GMP/ISO 13485 compliance.

SKILLS

Quality & Data Analysis – data-driven problem solving, statistical analysis, performance metrics and trending, root cause analysis (RCA), process optimization.

Technical & Programming – Python, SQL (PostgreSQL, MySQL, Oracle), Java Spring Boot, REST APIs, pandas, NumPy.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting.

DevOps & Process Management – Jenkins CI/CD pipelines, Git version control, Jira ticketing, code review practices, Agile/Scrum methodologies.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, log analysis, system health monitoring, incident response protocols.

Communication & Stakeholder Management – technical documentation (Confluence), cross-functional collaboration, translating complex concepts for diverse audiences, IELTS Band 7 English proficiency.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Production Monitoring & Incident Response Framework (HCL Technologies)

- Established **real-time monitoring dashboards** using **Splunk and Dynatrace** to track enterprise application health, reducing **mean time to resolution (MTTR)** by enabling rapid P1/P2 incident triage and root cause identification.
- Implemented **SLA tracking workflows** and escalation procedures through **Jira**, ensuring compliance with service level agreements and providing transparency to stakeholders on system reliability and incident trends.
- Developed **Python automation scripts** for alert correlation and log aggregation, reducing manual investigation overhead and improving visibility into systemic quality issues—methodology applicable to supplier non-conformance trending and CAPA tracking.

Automated Data Pipeline & Compliance Reporting (HCL Technologies)

- Architected **ETL pipelines** using **Python, SQL, and AWS Lambda** to extract, validate, and transform operational data for regulatory and audit reporting, ensuring **data accuracy and traceability** across enterprise systems.
- Built scheduled reporting workflows leveraging **PostgreSQL and MySQL** databases to generate performance metrics and quality KPIs, delivering insights to management and supporting data-driven strategic decisions.
- Documented data workflows and validation logic in **Confluence**, enabling knowledge transfer and establishing repeatable processes for compliance reporting—skills directly applicable to supplier audit documentation and quality system records management.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
