+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed production support and incident response for enterprise Java/.NET applications across **AWS** infrastructure, utilizing **Splunk, CloudWatch, and Dynatrace** for monitoring and SLA management; resolved **P1/P2 incidents** in time-critical environments with cross-functional alignment between business, IT, and QA teams.
- Translated business requirements into technical specifications by analyzing system dependencies and working with functional teams, technical architects, and engineering leads to ensure clear requirements understanding and delivery alignment.
- Designed and implemented **Python-based data pipelines and ETL workflows** for data validation and reporting, demonstrating ability to bridge business logic with technical implementation and support UAT through post-implementation phases.
- Developed **REST APIs and microservices** using **Java Spring Boot** and managed database operations across **PostgreSQL, MySQL, and Oracle**, including schema changes and ad-hoc query optimization for production systems.
- Orchestrated **CI/CD pipelines** using **Jenkins** and **Git** while performing code reviews and maintaining documentation in **Jira and Confluence**, ensuring traceability and alignment with Agile delivery ceremonies.
- Containerized applications using **Docker** and automated operational tasks with **Linux shell scripting** and **cron jobs**, reducing manual overhead and supporting infrastructure scalability across distributed environments.

SKILLS

Domain & Business Analysis – Requirements gathering and analysis, Technical specification development, Liaison with business and technical stakeholders, UAT support, Cross-functional team coordination.

Database & SQL – Oracle, PostgreSQL, MySQL, Query optimization, Schema design and changes, Data validation.

Programming & Scripting – Python, Java, SQL, Shell scripting, REST API development.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Microservice architecture.

DevOps & Tools – Jenkins, Git, CI/CD pipelines, Jira, Confluence, Code review management.

Monitoring & Production Support – Splunk, Dynatrace, CloudWatch, Incident response, SLA management, Production monitoring.

Frameworks & Data Engineering – Spring Boot, pandas, NumPy, Flask, FastAPI, ETL pipelines.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Production Support & Reliability Engineering (HCL Technologies)

- Led production support operations for mission-critical Java and .NET applications deployed on **AWS infrastructure**, utilizing **Splunk and Dynatrace** for proactive monitoring and rapid incident detection.
- Managed **P1/P2 incident response** workflows, coordinating with cross-functional teams (business, IT, QA) to resolve production issues within SLA windows and document root cause analyses.
- Optimized database performance by analyzing and executing **SQL queries** across **Oracle, PostgreSQL, and MySQL** environments; implemented schema changes and data validation procedures to ensure system reliability.
- Implemented infrastructure improvements through **Docker containerization** and automation of operational tasks using **Linux shell scripting**, reducing manual toil and improving deployment consistency.

Data Pipeline & Integration Solutions (HCL Technologies)

- Designed and delivered **Python-based ETL pipelines** for data integration and automated reporting, translating business data requirements into technical implementations that supported analytics and decision-making.
- Built **REST APIs** and microservices using **Java Spring Boot** to expose data and business logic, working closely with engineering and solution architect teams to ensure technical dependencies were identified and documented.
- Established **CI/CD automation** using **Jenkins** and **Git** for pipeline deployment and testing, implementing code review processes to maintain quality and traceability of solution delivery.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
