PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Translated technical insights into clear, actionable **business requirements** and **user stories** through analysis of production incidents, system performance data (**Splunk, Dynatrace, CloudWatch**) and stakeholder feedback; enabled delivery teams to prioritize high-impact improvements.
- Collaborated with cross-functional teams across **Java/Spring Boot, AWS**, and database platforms to understand technical feasibility, architecture constraints and delivery timelines; facilitated alignment between business needs and solution options in **Agile/Scrum** ceremonies.
- Designed and validated **data pipelines** and **ETL workflows** using **Python, pandas**, and **SQL** to support analytics and decision-making; produced process maps and data flow documentation to communicate requirements to delivery partners.
- Supported **UAT planning and execution** by creating test scenarios, documenting acceptance criteria, and performing defect triage on enterprise Java and .NET applications; validated post-implementation solutions to ensure business outcomes were achieved.
- Led **process analysis and continuous improvement** initiatives by analyzing production support metrics, incident trends, and operational data; identified optimization opportunities that reduced SLA breaches by enabling proactive monitoring strategies.
- Communicated complex technical concepts clearly to non-technical stakeholders through well-structured documentation, requirement artefacts, and change readiness materials; built trusted relationships through proactive engagement in discovery sessions and cross-functional workshops.

SKILLS

Business Analysis & Requirements – requirements gathering, user story creation, acceptance criteria definition, process mapping, stakeholder analysis.

Data & Analytics – SQL (PostgreSQL, MySQL, Oracle), Python, pandas, NumPy, ad-hoc data analysis, quantitative validation.

Technology & Delivery – AWS (EC2, S3, Lambda, CloudWatch), Java Spring Boot, REST APIs, Docker, CI/CD (Jenkins, Git).

Agile & Collaboration – Agile/Scrum ceremonies, Jira, Confluence, cross-functional collaboration, hybrid working practices.

Operations & Monitoring – production support, incident response (P1/P2), system reliability, SLA management, Splunk, Dynatrace.

Soft Skills – stakeholder communication, problem-solving, critical thinking, change enablement, workshop facilitation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Application Reliability & Optimization (HCL Technologies)

- Analysed production support data across multiple **Java** and **.NET** applications using **Splunk, Dynatrace, and CloudWatch**; identified recurring failure patterns and communicated root causes to delivery teams through detailed process maps and trend analysis.
- Collaborated with development and infrastructure teams to define requirements for automated monitoring and alerting solutions; created clear acceptance criteria that enabled efficient implementation of **CloudWatch** dashboards and incident response procedures.
- Supported **UAT and post-implementation validation** by designing test scenarios and documenting business acceptance criteria; ensured deployed solutions met operational requirements and SLA objectives.

Data Pipeline & Automation Framework (HCL Technologies)

- Designed and documented **ETL workflows** and data pipeline architectures using **Python, SQL, and AWS Lambda**; produced data flow diagrams and technical specifications that translated business reporting needs into clear delivery requirements.
- Facilitated requirements workshops with business stakeholders and technical teams to validate data sources, transformation logic, and output formats; created comprehensive user stories and acceptance criteria for development and testing teams.
- Validated delivered solutions through quantitative analysis of data accuracy and completeness; recommended process improvements based on operational performance metrics and stakeholder feedback.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
