

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **production support & incident management** for enterprise Java/.NET applications across **AWS** and on-premises environments, using **Splunk, CloudWatch, and Dynatrace** for observability; managed **P1/P2 incidents** with **SLA compliance** and contributed to post-incident root-cause analysis and runbook documentation.
- Designed and maintained **CI/CD pipelines** using **Jenkins**, implementing **Git** branching strategies, automated testing gates, and code review workflows to accelerate deployment cycles across multiple product teams.
- Automated operational tasks using **Python scripting** and shell scripting—including **ETL data pipelines**, scheduled reporting, and infrastructure health checks—reducing manual overhead by approximately **30%** and improving deployment reliability.
- Managed cloud infrastructure on **AWS (EC2, S3, Lambda, CloudWatch)** and containerized workloads using **Docker**, gaining hands-on experience with Infrastructure-as-Code principles and cloud resource optimization.
- Supported database operations across **PostgreSQL, MySQL, and Oracle**—writing ad-hoc queries, validating data integrity, performing schema migrations, and troubleshooting performance issues in production environments.
- Collaborated cross-functionally with product engineering, QA, and support teams using **Jira** and **Agile/Scrum ceremonies**; demonstrated strong communication skills by documenting procedures, technical decisions, and learnings in **Confluence** for team knowledge sharing.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux systems, cloud resource management.

DevOps & CI/CD – Jenkins pipelines, Git, Jira, CI/CD concepts, deployment automation, Infrastructure-as-Code principles.

Programming & Scripting – Python, Bash/shell scripting, Java Spring Boot, REST API development.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, logging, alerting, metrics collection.

Databases – PostgreSQL, MySQL, Oracle, SQL query optimization, schema management.

Soft Skills & Practices – Incident management, production support, documentation, Agile/Scrum, cross-functional collaboration, first-principles problem-solving.

Certifications & Learning – IELTS Academic (Band 7), Full Stack Java Spring Boot & Angular, Web Development (UC Davis), Python Programming (University of Michigan), MSc Data Analytics.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Java Application Production Support & Reliability (HCL Technologies)

- Operated mission-critical enterprise Java applications across **AWS** and on-premises infrastructure, monitoring system health using **Splunk, CloudWatch, and Dynatrace** dashboards; detected anomalies and responded to **P1/P2 incidents** within SLA targets.
- Collaborated with senior reliability engineers to investigate root causes, document findings in post-incident reviews, and create runbooks for common failure scenarios, strengthening team knowledge and reducing mean-time-to-recovery (MTTR).
- Automated routine operational tasks such as log analysis, resource health checks, and data validation using **Python** and **shell scripting** executed via **cron jobs** on **Linux** systems, freeing up team capacity for strategic work.

CI/CD Pipeline Development & Deployment Automation (HCL Technologies)

- Built and maintained **Jenkins CI/CD pipelines** for multiple product teams, implementing automated build, test, and deployment stages with **Git** integration and code review gates; standardized **Docker** containerization to ensure consistent deployments across environments.
- Managed cloud infrastructure provisioning on **AWS (EC2, S3, Lambda)**, gaining practical exposure to Infrastructure-as-Code concepts and supporting cost monitoring and resource optimization initiatives.
- Documented deployment procedures, troubleshooting guides, and architectural decisions in **Confluence**, enabling teams to self-serve and reducing operational dependencies; participated in **Agile ceremonies** to align DevOps work with product delivery timelines.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
