PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and maintained **ledger-posting logic** for enterprise Java/.NET applications supporting P1/P2 financial transactions; implemented **idempotent** processing patterns and reconciliation workflows using **SQL** (PostgreSQL, MySQL, Oracle) to ensure **100% accuracy** in production banking systems.
- Developed **integration services and APIs** using **Java Spring Boot** and **REST** frameworks; built event-driven data pipelines with **Python** for downstream systems (GL, analytics, notifications), processing **10K+** daily financial events with robust error handling and retries.
- Engineered **data models** and **ETL workflows** using **Python** (pandas, NumPy) and **SQL** to support Finance, Risk, and Regulatory reporting; automated **scheduled reporting** via cron jobs and **Jenkins** CI/CD pipelines, reducing manual effort by **~40%**.
- Implemented comprehensive test coverage (unit, integration, contract tests) for financial product logic; collaborated with product and risk teams on edge cases, posting rules, and lifecycle state management (onboarding, arrears, closures) using **Agile/Scrum** practices.
- Deployed and monitored core banking services on **AWS** (EC2, S3, Lambda, CloudWatch) and **Docker** containerised environments; managed observability and SLA compliance using **Splunk** and **Dynatrace**, achieving **99.5%** uptime for production systems.
- Contributed to cloud-native platform reliability and security; performed **Linux** log analysis, shell scripting, and code reviews via **Git** branching strategies; tracked defects and releases in **Jira**, supporting **Confluence**-based documentation for controls and architecture decisions.

SKILLS

Core Banking & Financial Systems – Ledger-posting logic, product lifecycle management, reconciliation, accounting principles, financial events, posting rules.

Backend Engineering – Java, Spring Boot, REST APIs, .NET, Python, Flask, FastAPI.

Data Engineering & Integration – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy), ETL, event-driven integrations, data pipelines, pub/sub patterns.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins, CI/CD.

Observability & Production Support – Splunk, Dynatrace, SLA management, incident response, monitoring.

Quality & Collaboration – Unit/integration/contract testing, Jira, Confluence, Agile/Scrum, code reviews.

Frontend (Basics) – Angular, React.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Banking Platform – Ledger & Product Logic (HCL Technologies)

- Designed and implemented core banking **product logic** for accounts, deposits, and fee management; built **ledger-posting** workflows ensuring idempotent and auditable financial transactions aligned with accounting principles.
- Developed **Java Spring Boot** microservices to configure product parameters, lifecycle states (onboarding, maturity, closures, arrears), and financial event schedules (interest accrual, compounding, billing cycles); integrated with **PostgreSQL** for persistent ledger state.
- Implemented comprehensive **unit and integration tests** covering edge cases and reconciliation scenarios; reduced post-release defects by ~35% through rigorous testing of posting rules and financial calculations.

Integration & Data Platform – APIs & Analytics (HCL Technologies)

- Built **REST APIs** and event-driven integration services using **Spring Boot** connecting core banking to downstream systems (payments, KYC, CRM, GL, fraud, notifications); implemented **pub/sub** patterns and robust error handling with retries and reconciliation.
- Engineered **ETL pipelines** in **Python** (pandas, NumPy) to extract and transform financial data for regulatory reporting and analytics; scheduled **Jenkins**-orchestrated jobs to deliver **daily reconciliation reports** to Finance and Risk teams.
- Deployed services on **AWS** (EC2, Lambda, CloudWatch) and **Docker**; monitored end-to-end integration health using **Splunk** and **Dynatrace**, maintaining **99.5%** uptime and **SLA compliance** for mission-critical data flows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
