PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **production support & incident management** for enterprise Java/.NET applications across multiple SLAs, achieving **P1/P2 incident response** times within **99.5% uptime** targets using **Splunk, Dynatrace, and CloudWatch** for real-time monitoring and observability.
- Designed and implemented **CI/CD automation pipelines** using **Jenkins** and **Git**, enabling **error-free deployments** and reducing deployment cycles by **40%** through infrastructure-as-code practices and operational gating.
- Developed **Python automation scripts** for data pipelines, ETL workflows, and compliance reporting; built self-healing capabilities and scheduled monitoring tasks using **Linux shell scripting** and cron jobs to reduce manual toil.
- Performed **reliability engineering** across **AWS infrastructure (EC2, S3, Lambda, CloudWatch)** and **Docker containerisation**, ensuring system availability, capacity planning, and performance optimization aligned with operational resilience standards.
- Executed **security & compliance practices** including SQL schema management, secure data validation, and infrastructure troubleshooting; gained hands-on experience with **Linux** system administration, log analysis, and **network diagnostics** for incident resolution.
- Collaborated with development teams in Agile/Scrum ceremonies using **Jira** and **Confluence**, providing operational feedback on resilience gaps and driving continuous improvement through blameless postmortems and mean-time-to-recovery (MTTR) optimization.

SKILLS

Site Reliability Engineering & DevOps – Production support, incident management, operational readiness, monitoring & observability, CI/CD pipeline management, infrastructure automation.

DevOps Tools & Platforms – Jenkins, Git, Bitbucket, Docker, AWS (EC2, S3, Lambda, CloudWatch), Linux, shell scripting.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, alerting, logging standards, system health analysis.

Programming & Scripting – Python, Java, SQL (PostgreSQL, MySQL, Oracle), shell scripting, REST API development.

Frameworks & Languages – Spring Boot, Flask, FastAPI, pandas, NumPy.

Security & Compliance – SSL/TLS basics, secure access practices, ITSM processes, compliance awareness, data validation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Java Application Production Support & Reliability Platform (HCL Technologies)

- Served as production readiness steward for enterprise-grade Java/.NET microservices, implementing **Dynatrace** and **Splunk** monitoring to ensure **99.5% service availability** and rapid incident detection across global deployments.
- Automated incident response workflows using **Python scripting** and **shell commands** for alert aggregation, log analysis, and self-healing capabilities; reduced manual escalations by **35%** and MTTR by **25%**.
- Developed **Jenkins CI/CD pipelines** with operational gating to enforce security and compliance checks before production promotion; integrated **Git** workflows with code review standards ensuring zero-error deployments.

Data Pipeline Automation & Compliance Reporting (HCL Technologies)

- Designed and deployed **Python-based ETL automation** for scheduled data validation, aggregation, and compliance reporting; leveraged **pandas** and **NumPy** for data reliability and pattern detection across multiple data sources.
- Implemented **AWS Lambda** functions and **CloudWatch** event-driven triggers for automated pipeline orchestration, reducing manual data processing effort by **50%** and ensuring timely compliance metric delivery.
- Collaborated with cross-functional teams to document operational procedures, troubleshoot stack traces and system-level issues using **Linux** diagnostics, and drive continuous improvement feedback loops to development teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
