PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led **production support and incident response** for enterprise Java/.NET applications serving **P1/P2 SLA obligations**, utilizing **Splunk, Dynatrace, and CloudWatch** for monitoring, observability, and Mean Time to Recovery optimization across global deployments.
- Designed and implemented **CI/CD automation pipelines** using **Jenkins, Git, and Groovy scripting** to enable software promotion, operational gating, and compliance reporting; reduced manual deployment overhead by embedding reliability checks throughout the delivery lifecycle.
- Developed **Python and shell scripts** for infrastructure automation, certificate lifecycle management, traffic routing, and scheduled compliance reporting; established **Ansible-based configuration management** for reproducible and auditable infrastructure changes.
- Architected **AWS cloud-native deployments** leveraging **EC2, S3, Lambda, and CloudWatch**; containerized applications using **Docker** and implemented secure access practices, encryption standards, and mutual TLS awareness for payment-grade resilience.
- Performed **SQL query optimization and schema management** across **PostgreSQL, MySQL, and Oracle** databases; conducted data validation and operational reporting to support incident triage and compliance audits.
- Collaborated cross-functionally with development teams on operational readiness reviews; led blameless postmortems and provided feedback on resiliency gaps, driving continuous improvement in system architecture and deployment practices.

SKILLS

DevOps & Reliability Engineering – Jenkins, Git, Groovy, shell scripting, CI/CD pipelines, incident management, SRE fundamentals, operational gating.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, secure access practices.

Monitoring & Observability – Splunk, Dynatrace, alerting configuration, logging standards, performance tuning.

Automation & Configuration Management – Python, Ansible, shell scripting, infrastructure automation, certificate lifecycle management.

Database & Data Management – PostgreSQL, MySQL, Oracle, SQL optimization, schema management, data validation.

Security & Compliance – mutual TLS, SSL/TLS handshake, encryption standards, SSH key management, ITSM processes, incident response.

Backend Development – Java Spring Boot, REST APIs, application lifecycle management, production support.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Application Reliability & Observability Program (HCL Technologies)

- Owned the operational readiness and lifecycle management of mission-critical Java and .NET microservices; integrated **Splunk and Dynatrace** monitoring across a fleet of **AWS EC2 instances** to achieve **99.5% uptime SLA** and reduced incident detection time by **40%**.
- Designed and deployed **Jenkins CI/CD pipelines** with automated compliance gates, incorporating **Groovy scripting** and **Git branching strategies** to enforce operational readiness checkpoints; enabled rapid software promotion while maintaining security and reliability standards.
- Implemented blameless postmortem processes and led **incident management** ceremonies; optimized Mean Time to Recovery (MTTR) through root cause analysis and systemic improvements, reducing production incident recurrence by **35%**.

Infrastructure Automation & Certificate Lifecycle Management (HCL Technologies)

- Built **Ansible playbooks** and **Python automation scripts** to manage certificate renewal, traffic routing configuration, and compliance reporting at scale; reduced manual operational toil by **60%** and eliminated certificate expiration incidents.
- Developed **shell scripting solutions** for log analysis, system diagnostics, and automated alerting; integrated with **CloudWatch** and **Splunk** to enable proactive detection of infrastructure drift and security misconfigurations.
- Collaborated with security and compliance teams to embed **mutual TLS, encryption standards, and SSH key rotation** into automated workflows; achieved **PCI compliance certification** and reduced security audit findings by **50%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
