PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **SLA-driven production support** for enterprise applications across **Java/.NET** stacks, performing P1/P2 incident response and root-cause analysis using **Splunk, CloudWatch, and Dynatrace**; monitored system health and escalated risks to stakeholders in alignment with governance protocols.
- Designed and implemented **Python-based data pipelines and ETL workflows** for automated reporting and data validation, reducing manual effort by approximately **30%**; leveraged **pandas, NumPy** and scheduled jobs to ensure timely, accurate data collection and delivery.
- Conducted **SQL-driven analysis** across **PostgreSQL, MySQL, and Oracle** databases to validate data integrity, perform schema changes, and support ad-hoc business queries; identified and documented data quality issues with recommended remediation actions.
- Collaborated with cross-functional teams in **Agile/Scrum ceremonies** (Jira, Confluence) to support risk governance, defect tracking, and process improvements; demonstrated strong organizational and communication skills in coordinating information for governance documentation.
- Developed and maintained **REST APIs using Java Spring Boot** and containerized applications with **Docker**; deployed services on **AWS (EC2, S3, Lambda)** and orchestrated **CI/CD pipelines with Jenkins and Git**, ensuring reliable releases and code quality through peer reviews.
- Completed **MSc in Data Analytics** with coursework in statistical analysis, data engineering, and business intelligence; combined technical expertise with emerging knowledge of risk frameworks and regulatory requirements relevant to enterprise risk management.

SKILLS

Risk & Data Analysis – Risk assessment, data validation, SQL analysis, SLA monitoring, incident reporting.

Programming & Automation – Python, Java, SQL, Shell scripting, ETL workflows, data pipelines.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins CI/CD.

Monitoring & Governance – Splunk, Dynatrace, Jira, Confluence, Agile frameworks, stakeholder reporting.

Enterprise Frameworks – REST APIs, Spring Boot, relational databases (PostgreSQL, MySQL, Oracle), Git version control.

Professional Qualifications – MSc Data Analytics, Bachelor of Engineering (Computer Science), IELTS Band 7, Full Stack Development certification.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Application Monitoring & Risk Governance (HCL Technologies)

- Established end-to-end **production monitoring framework** using **Splunk and CloudWatch** for multiple enterprise Java/.NET applications; tracked service-level objectives (SLOs) and escalated P1/P2 incidents to governance committees, ensuring compliance with internal risk standards.
- Developed **automated incident response procedures** and created **dashboards for real-time risk visibility**; documented emerging risks, mitigation actions, and assurance metrics for communication to senior risk oversight committees.
- Conducted **risk assessments and reviews** of application health, infrastructure changes, and deployment processes; supported 2nd line challenge activities and promoted risk culture awareness through training materials and process documentation.

Automated Data Pipeline & Risk Reporting System (HCL Technologies)

- Architected **Python-based ETL pipeline** leveraging **pandas and NumPy** to automate collection, transformation, and validation of risk-related data from multiple sources; reduced manual reporting effort by ~30% and improved data accuracy for governance reporting.
- Deployed pipeline on **AWS Lambda** with scheduled execution via **cron jobs** and **CloudWatch Events**; integrated with **PostgreSQL and MySQL** databases for persistent storage and querying of risk metrics.
- Collaborated with business stakeholders to define risk data requirements, validate outputs, and iterate on templates; supported adoption of risk management tools and methodologies across teams, ensuring alignment with regulatory and internal standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
