PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided day-to-day **engineering design support** to production teams, resolving assembly, wiring, and testing issues by liaising between Design Engineering and Manufacturing.
- Reviewed and revised **manufacturing drawings and Bills of Materials (BOMs)** for completeness and manufacturability, ensuring alignment with production requirements.
- Supported production personnel with **technical guidance and troubleshooting**, participating in daily production meetings and manufacturing reviews to address emergent issues.
- Reviewed new designs prior to release to identify **manufacturing risks and opportunities for improvement**, contributing to continuous improvement and lean initiatives.
- Drove the **"As-Built" documentation process** and supported internal and external audits by ensuring accuracy and completeness of engineering records.
- Wrote **Python scripts** to automate data extraction for production reporting and assist in ETL processes, reducing manual effort by approximately **15%**.
- Managed the **Site Material Request (SMR) process**, ensuring timely procurement and availability of necessary components for manufacturing builds.

SKILLS

Core Competencies – Production Support, Manufacturing Engineering, Technical Support, Problem Solving, Root Cause Analysis, Quality Investigations, Continuous Improvement

Electrical Manufacturing – LV Switchgear, Busbar, UPS, IEC 61439 Compliance, Electrical Diagrams, Mechanical Drawings

Software & Tools – AutoCAD, Microsoft Office Suite, Jira, Confluence, Git, Jenkins, Splunk, Dynatrace, CloudWatch

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs

Cloud & Infrastructure – AWS (EC2, S3, Lambda), Docker, Linux

Data & Analytics – Power BI, DAX, Tableau, R, pandas, NumPy, scikit-learn

PROJECTS

Production Support Automation for Switchgear Assembly

- Developed **Python scripts** to parse and analyze manufacturing logs from production lines, identifying common failure patterns in wiring and testing phases.
- Created a **Power BI dashboard** to visualize key production metrics, including defect rates and troubleshooting resolution times, enabling faster identification of bottlenecks for a team of **8 engineers**.
- Implemented automated data validation checks for incoming BOM data using **SQL queries** against a PostgreSQL database, reducing data entry errors by approximately **20%**.

Enhancing ERP Integration for Manufacturing Workflows

- Designed and implemented **REST APIs** using Java Spring Boot to integrate the manufacturing execution system with the enterprise ERP system, facilitating real-time data exchange for material tracking.
- Supported the deployment and configuration of the integration layer on **AWS EC2 instances**, ensuring reliable communication between disparate systems.
- Authored comprehensive **technical documentation and runbooks** for the new integration, improving onboarding time for operations teams by an estimated **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
