HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored and maintained **Swift** UI tests for iOS and macOS applications, focusing on internationalization and localization requirements across various device types.
- Extended an **AI-driven automation service** by implementing new device interaction logic and refining model output presentation for enhanced test result clarity.
- Taught the **AI automation service** to recognize and interact with new device states, improving its ability to simulate complex user scenarios for comprehensive testing.
- Developed automated testing strategies and wrote **Python** scripts to simulate backend service interactions and validate API responses for localized content delivery.
- Debugged and resolved complex issues in **Swift** and **Python** codebases, collaborating with international teammates to ensure software quality across global releases.
- Integrated **Git** for version control and code reviews, participating in Agile ceremonies to estimate technical tasks and plan sprint deliverables for the release engineering team.
- Deployed containerized automation services to **AWS EC2** instances, managing basic resource configurations and monitoring application health via **CloudWatch**.

SKILLS

Languages – Swift, Python, English

Testing Frameworks – XCTest, UI Automation

AI/ML – LLMs, AI-driven automation, Model evaluation, Prompt writing, Agent development

Tools – Git, Xcode, CI/CD, Docker, AWS (EC2, CloudWatch)

Platforms – iOS, macOS

PROJECTS

Localized UI Automation Framework

- Engineered an automated UI testing framework using **Swift** and **XCTest** to validate software behavior across 15 different language and region configurations.
- Integrated prompt engineering techniques to guide an **LLM-based agent** in simulating complex user journeys, improving test coverage for edge cases by **20%**.
- Developed **Python** scripts for data validation and result aggregation, generating reports on test reliability and localization defects found.

AI Automation Service Extension

- Enhanced an existing **AI-driven automation service** by adding new device interaction capabilities, enabling testing of advanced features on **iOS** simulators.
- Implemented evaluation metrics to measure the impact of AI model tuning on test execution speed and defect detection rates, observing a **15%** reduction in false positives.
- Collaborated with senior engineers to refine model behavior and present test results in a more interpretable format for quality assurance teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
