PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built **LLM-based systems** for automated quality assessment, incorporating adversarial grading to identify false positive results and improve reliability.
- Developed **evaluation frameworks** for LLM performance, including benchmarks and ground-truth datasets, to measure and enhance precision and recall rates.
- Constructed **feedback loops** that transform confirmed model errors into actionable data for prompt refinement and classifier retraining.
- Implemented classification pipelines to triage software test failures, distinguishing between genuine product issues and test or tooling anomalies.
- Wrote clean, reviewable **Python code** for ML application backends, contributing to a maintainable codebase within a fast-paced development environment.
- Collaborated with **automation, quality, and localization engineers** across multiple time zones to ensure software quality for international users.
- Containerized **ML inference services** using Docker and deployed them to an AWS EKS cluster, managing configurations and resource allocation.

SKILLS

LLM & ML Engineering – LLMs, Prompt Engineering, Model Evaluation, Fine-Tuning, Classification Pipelines, Adversarial Grading, Agentic Designs, Structured Output, Tool Use

Programming & Backend – Python, Swift, REST APIs, FastAPI, Flask, Java Spring Boot, Microservices

Cloud & Infrastructure – AWS, Docker, Kubernetes, EKS, CI/CD, Jenkins

Data & Evaluation – Dataset Curation, Ground-Truth Datasets, Rubrics, Precision, Recall, False-Positive Rates, Benchmarking

Software Development Practices – Code Reviews, Agile Methodologies, Iterative Improvement, System Design

PROJECTS

LLM-Powered Software Quality Grading System

- Developed an **LLM-based system** to automatically grade software test outputs, significantly reducing manual review effort for localization engineers.
- Designed and implemented **prompt engineering strategies** and rubrics to evaluate model accuracy, achieving a **15% improvement** in precision for identifying critical test failures.
- Built a Python backend service using **FastAPI** to serve the LLM, managing request routing and structured output generation for downstream systems.

Automated Test Failure Triage Pipeline

- Engineered a **classification pipeline** in Python to categorize software test failures, distinguishing between product defects and environmental or tooling issues for an enterprise client.
- Curated a **ground-truth dataset** of 5,000+ test failures, which was used to train a scikit-learn classifier, reducing misclassification by **22%**.
- Integrated the pipeline with **Jenkins CI/CD**, enabling automated routing of failure reports to the appropriate engineering teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
