HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for core financial system integrations, handling request/response validation and implementing circuit-breaker patterns.
- Designed and implemented RESTful APIs in **Java Spring Boot** to facilitate data exchange between the payments operations dashboard and downstream enterprise systems, processing approximately 1,500 requests per hour.
- Managed and optimized relational database schemas and queries in **PostgreSQL** and **Oracle** for the enterprise ERP system, supporting data extraction for critical business reports.
- Contributed to the design and delivery of enterprise-grade software solutions supporting mission-critical investment functions, shaping key decisions and technical direction within the team.
- Championed code quality and reliability by participating in rigorous code reviews and contributing to technical documentation for new feature development, ensuring adherence to architectural standards.
- Collaborated with cross-functional teams and business analysts to gather requirements, support User Acceptance Testing (UAT), and triage post-implementation issues for integrated financial systems.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing build pipelines via **Jenkins** for consistent and automated deployments.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, JUnit, Maven

Databases – SQL, PostgreSQL, Oracle, MySQL, PL/SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Scripting & Automation – Python, Shell Scripting

Observability & Monitoring – Splunk, Dynatrace

Methodologies – Agile, Scrum, Change Management, Incident Response

PROJECTS

Enterprise Payments Dashboard Enhancement

- Engineered Python scripts to automate the parsing and validation of 5,000+ daily transaction messages, identifying and flagging ~350 malformed records for manual review.
- Developed and deployed new monitoring alerts within the payments operations dashboard using Splunk queries, reducing P1 incident detection time by an average of 15 minutes.
- Collaborated with business analysts to define requirements for reconciliation workflows, ensuring data integrity and audit trail completeness for financial transactions.

Financial System Integration Layer

- Designed and implemented a **Java Spring Boot**-based integration service to connect the ERP system with a third-party reporting platform via REST APIs.
- Wrote **SQL** scripts to extract and transform data from Oracle databases, preparing datasets for batch processing and loading into the new reporting service.
- Managed the deployment and configuration of the integration service on **AWS EC2** instances, integrating with existing CI/CD pipelines using Jenkins.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
