PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and executed test scenarios and regression packs for core policy administration and claims processing modules, ensuring alignment with business requirements.
- Validated complex data flows and transformations originating from IBM AS/400 environments into modernised platforms, identifying and documenting discrepancies.
- Collaborated with business analysts and product owners to refine acceptance criteria and conduct User Acceptance Testing (UAT) for new feature releases.
- Developed and maintained comprehensive test strategies and detailed test plans, covering functional, integration, and end-to-end testing phases.
- Managed defect tracking and resolution lifecycle using Jira, communicating testing risks, issues, and their potential business impact to stakeholders.
- Performed hands-on testing of IBM AS/400 systems, including data validation and user interface interaction, contributing to the legacy platform modernisation effort.
- Automated data validation checks for cross-system integrations using Python scripts, reducing manual effort by approximately **40%** and improving data integrity.

SKILLS

Core Insurance Platforms – Life & Pensions Insurance, Policy Administration, Claims Processing, Pensions

Testing Methodologies & Tools – Test Strategy, Test Scenarios, Regression Testing, UAT, Defect Management, Jira, Test Planning

Legacy Systems – IBM AS/400, Life400, Mainframe Exposure

Data Validation & Flow Analysis – Data Flows, Data Transformations, Relational Databases

Programming & Scripting – Python, SQL

Agile & Collaboration – Agile Methodologies, Stakeholder Communication, Business Analysis

PROJECTS

Life & Pensions Policy Administration System Modernisation

- Developed detailed test cases for a new policy administration system, covering new product implementations and existing customer data migration scenarios.
- Executed regression testing cycles on the IBM AS/400 platform to ensure backward compatibility and data integrity during phased rollouts.
- Collaborated with the development team and business stakeholders to triage and resolve defects identified during testing, contributing to a smoother release process.

Insurance Claims Processing Workflow Automation

- Designed and implemented automated test scripts using Python to validate claims data processing and payment calculations, achieving **~85%** test coverage for core workflows.
- Performed functional and integration testing on the claims system, focusing on user interface interactions and data consistency across integrated modules.
- Documented test results and provided clear feedback to the project team on system stability and adherence to business rules.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
