HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot applications**, designing and implementing **REST APIs** for cross-service data exchange, handling approximately **1,500 requests per minute** during peak hours.
- Engineered **Python scripts** to automate data ingestion and transformation processes for enterprise reporting, reducing manual data preparation time by **40%** for the operations team.
- Managed production support for critical enterprise systems using **Splunk** and **Dynatrace** for monitoring and alerting, responding to and resolving over **50 P1/P2 incidents** within SLA targets.
- Designed and implemented **ETL/ELT data pipelines** for enterprise data assets, ensuring data integrity and accessibility across various SQL and NoSQL environments.
- Collaborated with business stakeholders to define data requirements and translate them into technical specifications for scalable **data solutions**, ensuring alignment with strategic objectives.
- Applied **data governance principles** and controls to maintain high standards of data quality and compliance across the organization's data architecture.
- Containerized **Java Spring Boot services** using **Docker** and deployed them to an **AWS EC2** environment, managing configurations and basic resource allocation.

SKILLS

Data Engineering – Data Architecture, Data Modelling, ETL, ELT, Data Governance, Data Quality, Data Stewardship, Data Lake Architectures, Data Mesh

Cloud & Big Data – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, Snowflake, Hadoop, Spark

Databases – SQL, NoSQL, PostgreSQL, MySQL, Oracle, Collibra, Master Data Management (MDM)

Programming & Scripting – Python, Java, Spring Boot, REST APIs, R, RStudio

Analytics & BI – Power BI, Tableau, DAX, Power Query, Business Intelligence, Machine Learning, AI

Methodologies & Tools – Agile, Scrum, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Data Lakehouse Implementation

- Designed and built a scalable **data lakehouse architecture** on **AWS S3**, integrating batch and streaming data sources for analytics.
- Developed **Python ETL pipelines** using pandas to ingest and transform structured and unstructured data, ensuring data quality for downstream consumption.
- Implemented **SQL-based data modelling** and partitioning strategies to optimize query performance for BI tools and data science teams, reducing report generation times by approximately **30%**.

Financial Transactions Data Pipeline

- Constructed a **Python data pipeline** to process and aggregate financial transaction data from multiple sources, supporting operational monitoring.
- Applied **SQL** to perform data validation and reconciliation checks, identifying and flagging discrepancies for investigation.
- Developed **Power BI dashboards** to visualize key transaction metrics and operational alerts for business stakeholders, facilitating quicker decision-making.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
