PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Installed and configured rack-mounted servers, network switches, and storage arrays in a high-density data centre environment, adhering to precise layout specifications for **50+ devices** per deployment.
- Executed **remote hands support** tasks including cable management, power cycling, hardware reseating, and visual inspection of physical infrastructure for enterprise clients.
- Performed basic hardware diagnostics on server components (RAM, HDD, PSU) and documented findings for escalation to remote engineering teams, resolving **~15% of initial hardware faults** without vendor dispatch.
- Coordinated with on-site facilities and security personnel to ensure safe and efficient access to data halls, managing **daily movement logs** and maintaining clear communication channels.
- Assisted in the deployment of new network infrastructure, including the racking and cabling of **20 Cisco switches** and 10 routers, ensuring adherence to network architecture diagrams.
- Responded to and resolved **hardware-related tickets** within a 4-hour SLA, prioritising urgent requests for production systems and maintaining accurate ticket status updates in the system.
- Maintained inventory of installed hardware and spare parts, updating asset management databases with **serial numbers and location tags** for over 200 devices.

SKILLS

Hardware Installation – Rack and Stack, Server Installation, Network Switch Installation, Storage Array Installation, Cabling, Power Management.

Diagnostics & Troubleshooting – Hardware Diagnostics, Basic Fault Isolation, Visual Inspection, Log Analysis, Ticket Management.

Data Centre Operations – Remote Hands Support, Asset Management, Inventory Control, Physical Security Coordination, Facilities Coordination.

Operating Systems – Linux, Windows Server.

Networking – Network Cabling, Switch Configuration (Basic), Router Installation.

Tools & Methodologies – Jira, Confluence, ITIL (Fundamentals).

PROJECTS

Data Centre Hardware Deployment & Inventory System

- Developed a **Python script** to automate the generation of inventory reports from raw asset data, reducing manual data entry time by **~40%**.
- Designed and implemented a **relational database schema** (PostgreSQL) to track server, network, and storage hardware, including component details and rack locations for **over 500 assets**.
- Created a command-line interface tool using **FastAPI** for querying hardware status and location, improving accessibility for the support team.

On-Site Support Workflow Automation (HCL Technologies)

- Engineered **Python scripts** to automate ticket categorization and initial data collection for hardware-related incidents, streamlining the triage process for **an average of 50 tickets per week**.
- Developed documentation and runbooks for common **remote hands tasks**, standardising procedures and reducing resolution time for routine hardware checks by **~20%**.
- Integrated with internal ticketing system (Jira) to pull incident details and update ticket status programmatically.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
