HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed native Android applications for fleet safety systems, focusing on **camera and sensor integration** to enhance vehicle monitoring capabilities.
- Implemented **new user-facing features** within the Android application, directly contributing to the product roadmap for fleet risk management.
- Participated in **agile planning sessions** and sprint ceremonies, providing technical estimations and contributing to the team's delivery cadence.
- Collaborated with **cross-functional teams** including product managers and QA engineers to define requirements, troubleshoot issues, and ensure timely delivery of app updates.
- Refactored existing Android codebases to improve performance and maintainability, ensuring adherence to **coding standards** and best practices.
- Integrated third-party SDKs for device management and data synchronization, expanding the application's functionality and compatibility with diverse hardware.
- Containerized development environments using **Docker** to streamline setup and ensure consistency across developer workstations and testing infrastructure.

SKILLS

Mobile Development – Android, Java, Kotlin, Android SDK, Camera API, Sensor API

Development Tools – Git, Jenkins, Jira, Confluence, Docker

Programming Languages – Java, Python, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Methodologies – Agile, Scrum

PROJECTS

Android Driver Monitoring Application

- Developed an Android application to capture and transmit **in-vehicle sensor data**, including GPS and accelerometer readings, for fleet analytics.
- Implemented real-time **camera feed processing** and event triggering based on driver behavior anomalies, integrating with a backend API.
- Designed the user interface for presenting **driver safety scores** and incident alerts, ensuring clear and actionable information for fleet managers.

Fleet Data Synchronization Service

- Built a Python-based background service for synchronizing device telemetry data from Android clients to a central data warehouse.
- Managed data ingestion pipelines using **SQL** and **PostgreSQL**, ensuring data integrity and efficient storage for large volumes of operational data.
- Automated report generation for fleet operational summaries using Python scripting, providing weekly insights to the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
