HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built scalable ETL/ELT data pipelines using **Python** and **Airflow** to integrate new data sources and manage complex SQL transformations for the Snowflake data warehouse.
- Optimized existing **SQL** and **ETL** processes, troubleshooting data load issues and implementing solutions that improved data ingestion reliability by approximately 15%.
- Developed and maintained extensible, well-structured **data models** and **data products** within Snowflake, incorporating **dbt** for transformation logic and version control.
- Implemented and enforced best practices for **data quality**, standardizing pipelines and ensuring data accuracy and consistency across critical business datasets.
- Continuously refined the **Snowflake data warehouse** architecture and data models, enhancing query performance and cost-efficiency for analytical workloads.
- Collaborated with **Product & Technology Engineering teams** to co-develop data functionalities, translating business requirements into technical specifications for data solutions.
- Containerized data pipeline components using **Docker** and deployed them to an **AWS** environment, ensuring consistent execution and simplified management.

SKILLS

Data Warehousing – Snowflake, Redshift, BigQuery, Data Modeling, Kimball, Inmon

Data Orchestration & Pipelines – Python, SQL, Airflow, dbt, ETL, ELT, JSON

Cloud Platforms – AWS, S3, Bedrock

Data Quality & Testing – Soda, Automated Tests, CI/CD

Development Tools – GitHub, Jenkins

PROJECTS

Snowflake Data Warehouse Optimization

- Refactored complex **SQL** transformations within **dbt**, reducing average query execution time by **30%** for key reporting datasets.
- Developed new **data models** in Snowflake to support a new product analytics initiative, integrating disparate data sources via Python scripts.
- Implemented data quality checks using **Soda**, identifying and resolving an average of **10** critical data integrity issues per week.

Airflow-Managed ETL for Customer Data

- Designed and deployed an end-to-end data pipeline using **Airflow** to ingest and process semi-structured **JSON** data from external customer APIs.
- Wrote **Python** scripts to clean, transform, and load data into the central data warehouse, ensuring data was ready for downstream analytics and reporting.
- Established monitoring and alerting for the pipeline, achieving over **98%** job success rate and reducing manual intervention by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
