# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Designed and implemented scalable data pipelines within **Snowflake** using **Python** and **SQL** to process and deliver large datasets for analytical use.
- Optimized complex **SQL** queries and developed stored procedures to transform and prepare terabyte-scale datasets, reducing data preparation time by **30%**.
- Developed and scheduled **Snowflake tasks and streams** to automate data processing workflows, ensuring continuous data updates for critical business intelligence reporting.
- Configured **Snowflake data sharing** protocols to facilitate secure and efficient data exchange between internal analytics teams and external financial partners.
- Constructed advanced data transformations and scalable analytics solutions using **Snowpark** and **Python**, integrating with existing data infrastructure.
- Managed source code for data pipeline development and collaborated with team members using **GitHub**, adhering to version control best practices and code quality standards.
- Applied **DevOps practices** across the data engineering lifecycle, streamlining deployment processes and enhancing the reliability of data solutions in a cloud environment.

## SKILLS

**Cloud Data Platforms** – Snowflake, AWS (EC2, S3, Lambda, CloudWatch)

**Data Transformation & Pipelines** – SQL, Python, Snowpark, ETL, Data Warehousing, Data Modelling

**Database Technologies** – PostgreSQL, MySQL, Oracle

**Version Control & Collaboration** – GitHub, Git

**Automation & Orchestration** – Snowflake Tasks, Snowflake Streams, Jenkins

**Programming Languages** – Python, Java, SQL

**Observability & Support** – Splunk, Dynatrace

## PROJECTS

### Enterprise Data Pipeline Modernization (HCL Technologies)

- Engineered a new data ingestion and transformation pipeline using **Python** and **SQL** on AWS infrastructure to consolidate data from disparate enterprise systems.
- Implemented data quality checks and validation routines within the pipeline, reducing downstream data error rates by **18%** and improving report accuracy.
- Containerized pipeline components using **Docker** and integrated with **Jenkins** for automated CI/CD, enabling more frequent and reliable deployments.

### Financial Transaction Analytics Dashboard (HCL Technologies)

- Developed a series of **SQL** queries and Python scripts to extract and aggregate transaction data from a payments operations dashboard, supporting analytical reporting.
- Designed and built interactive data visualizations and reports using **Power BI**, translating complex financial data into actionable insights for business stakeholders.
- Collaborated with operations teams to gather requirements and refine reporting metrics, ensuring the dashboard accurately reflected key performance indicators for transaction monitoring.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
