HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built scalable data pipelines within **Snowflake** to support high-performance data delivery, automating workflows using **Snowflake tasks and streams**.
- Wrote and optimized complex **SQL queries** and stored procedures to transform and prepare large datasets for business analysis, ensuring data integrity and efficiency.
- Developed advanced data transformations and supported scalable analytics solutions using **Snowpark and Python**, integrating with cloud data sources.
- Managed source code and collaborated with team members using **GitHub** for version control and code quality assurance across the development lifecycle.
- Applied **DevOps practices** including CI/CD principles to streamline the deployment and improve the reliability of data solutions.
- Analyzed large and complex datasets to identify patterns and resolve data quality issues, providing insights for informed decision-making.
- Configured **Snowflake data sharing** to enable secure and efficient data exchange between internal teams and external partners.

SKILLS

Data Warehousing – Snowflake, SQL, Python, Snowpark, Data Pipelines, ETL

Database Technologies – SQL, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Programming Languages – Python, Java, SQL

Tools & Methodologies – GitHub, Jenkins, Jira, Confluence, Agile/Scrum, DevOps

Data Visualization – Power BI, Tableau, DAX

PROJECTS

Financial Data Pipeline Modernization (HCL Technologies)

- Engineered a new data pipeline using **Python and SQL** to ingest and process financial transaction data, replacing a legacy batch system.
- Developed **Snowflake tasks and streams** to automate the loading and transformation of daily financial datasets, improving data freshness by 12 hours.
- Implemented data quality checks and validation routines within the pipeline to ensure the accuracy of reporting outputs for business stakeholders.

Enterprise Data Warehouse Optimization (HCL Technologies)

- Optimized complex **SQL queries** and database schemas across PostgreSQL and Oracle to improve the performance of critical business reports by an average of 30%.
- Built automated data validation scripts in **Python** to reconcile data between source systems and the data warehouse, reducing manual reconciliation effort by 8 hours per week.
- Collaborated with operations teams to implement change management processes for schema updates and data migration activities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
