PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed responsive user interfaces for a cybersecurity platform using **React**, **TypeScript**, and modern JavaScript, ensuring a seamless user experience across devices.
- Contributed to the backend development of a **Python**-based API service, implementing **RESTful endpoints** for data retrieval and manipulation, integrating with PostgreSQL.
- Integrated frontend components with backend services through well-defined **APIs**, ensuring efficient data flow and consistent application behaviour for new features.
- Collaborated with **AI/ML engineers** to integrate model outputs into user-facing dashboards, translating complex data insights into actionable information for cybersecurity analysts.
- Implemented automated testing strategies, including **unit tests** and **integration tests**, to ensure code quality, reliability, and maintainability for frontend and backend components.
- Participated in **Agile ceremonies**, including sprint planning and daily stand-ups, contributing to estimation and technical discussions for feature development cycles.
- Containerized web applications using **Docker** and deployed them to cloud environments, managing build pipelines with **Jenkins** for continuous integration and delivery.

SKILLS

Frontend Development – React, JavaScript, TypeScript, HTML5, CSS3, Responsive Design

Backend Development – Python, Flask, FastAPI, REST APIs, Node.js

Databases – SQL, PostgreSQL, Relational Databases

Cloud & DevOps – AWS, Docker, Jenkins, Git, CI/CD

AI/ML Context – AI-driven platforms, Machine Learning integration

Development Practices – Agile Methodologies, Automated Testing, Secure Coding

PROJECTS

Cyber Threat Intelligence Dashboard

- Engineered a **React**-based frontend application to visualize real-time cyber threat data, integrating with backend APIs to display security alerts and risk assessments.
- Developed **Python Flask** endpoints to serve processed threat intelligence data, supporting dynamic filtering and user-specific data views for analysts.
- Implemented data fetching and state management patterns, ensuring efficient updates and a responsive user interface for a high-volume data stream.

Internal API Service for Data Aggregation

- Built a **Python FastAPI** service to aggregate data from multiple internal sources, providing a unified API for frontend consumption and downstream analytics.
- Designed and implemented a **PostgreSQL** schema to store and efficiently query aggregated security event data, supporting complex analytical queries.
- Containerized the service using **Docker** and configured **Jenkins** pipelines for automated builds and deployments to a cloud environment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
