HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Owned investigations into alert-related escalations for enterprise customers, identifying root causes across metric behavior, configuration edge cases, and backend evaluation logic on the **Datadog platform**.
- Developed scalable diagnostics and reusable response strategies for alert-related issues, shortening time to resolution for complex investigations by approximately **30%**.
- Collaborated with Product and Engineering teams to flag inconsistent monitor behavior and propose platform enhancements, ensuring alignment with user expectations for **alerting functionality**.
- Led enablement sessions, including async training and live office hours, to ensure global Solutions teams understood **Datadog's alerting system** and best practices.
- Debugged alert misfires, delayed notifications, and noisy monitors involving complex alerting logic, scopes, groups, and recovery thresholds for a global client base.
- Interpreted how data aggregation, late points, and gaps affected alert evaluation and incident response, providing clear explanations to customers and internal teams.
- Containerized diagnostic tooling using **Docker** and deployed them on **AWS EC2** instances to support investigations and enable faster troubleshooting.

SKILLS

Alerting & Monitoring – Metric monitors, Composite monitors, Anomaly detection, Logs monitoring, SLOs, Notification rules, Evaluation windows, Alert fatigue reduction, Signal visibility

Core Technologies – Datadog, APIs, Linux, Shell scripting, SQL, PostgreSQL, Java, Spring Boot, Python, Docker, AWS

Troubleshooting & Debugging – Root Cause Analysis, Incident Response, Production Support, SLA Management, P1/P2 Incidents, Log Analysis, Debugging Logic, Configuration Edge Cases

Data & Observability – Metric Behavior, Data Aggregation, Data Gaps, Late Points, Data Visualization, Observability Platform

Customer Engagement – Technical Escalations, Customer Support, Stakeholder Collaboration, Requirements Gathering, Field-Ready Resources, Enablement, Training

PROJECTS

Production Alerting System Enhancement (HCL Technologies)

- Enhanced an existing **Java Spring Boot**-based financial-services operations dashboard by developing new alerting rules and recovery logic to monitor transaction processing workflows.
- Integrated **Splunk** for advanced log analysis and anomaly detection, improving the identification of root causes for alert escalations by approximately **20%**.
- Refactored SQL queries against a **PostgreSQL** database to optimize the retrieval of transaction data for real-time monitoring dashboards, reducing query times by up to **15%**.

Customer Alerting Diagnostics Tool

- Developed a Python-based diagnostic tool to help customers analyze alert misfires and notification delays, integrating with a simulated API for alert data retrieval.
- Implemented logic to interpret common alerting issues, such as scope misconfigurations and evaluation window discrepancies, providing actionable insights to end-users.
- Containerized the tool using **Docker** for easy deployment and distribution to customer support engineers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
