HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** data pipelines for extracting and transforming data from relational databases, supporting daily reporting operations for enterprise systems.
- Designed and implemented **SQL** schemas and complex queries across **PostgreSQL** and **MySQL** for data validation and integration testing, ensuring data integrity for critical business workflows.
- Engineered **Java Spring Boot** REST APIs to facilitate data exchange between microservices and legacy enterprise applications, handling approximately 500 requests per minute.
- Collaborated with data consumers across marketing and product teams to define data requirements for reporting dashboards, translating business needs into technical specifications for data models.
- Built and optimized **SQL** queries for large-scale data warehousing projects, reducing analytical report execution times by **18%** on average.
- Developed feature pipelines in **Python** to prepare datasets for predictive models, supporting the training and scoring workflows for machine learning applications.
- Containerized **Java** and **Python** applications using **Docker** and deployed them to **AWS EC2** instances, managing configuration and basic resource allocation.

SKILLS

Data Engineering – Data Pipelines, Data Warehousing, Data Modeling, ETL, Feature Engineering, Data Transformation

Programming Languages – Python, SQL, Java

Databases – PostgreSQL, MySQL, Oracle, Redshift

Cloud Platforms – AWS (EC2, S3, Lambda, Athena, Glue, Kinesis, SageMaker, Bedrock)

ML/AI – Machine Learning Workflows, scikit-learn, XGBoost, Model Evaluation, MLOps

Tools & Technologies – Docker, Jenkins, Git, Jira, Splunk, Dynatrace, Pandas, NumPy, FastAPI

PROJECTS

Data Pipeline for Online Marketplace Insights

- Constructed robust **Python** data pipelines to ingest and transform data from multiple sources within large-scale online marketplaces, enabling downstream reporting and analytics.
- Implemented **SQL**-based data transformations and modeling techniques on **AWS Redshift** to create curated datasets for end-users and product teams, simplifying access to raw data.
- Collaborated with application development teams to integrate data feeds, ensuring timely and appropriate data availability for website features, including those powered by predictive models.

Machine Learning Feature Engineering Pipeline

- Developed a **Python** feature engineering pipeline to extract and process relevant features from large transaction datasets, preparing data for machine learning model training.
- Applied **scikit-learn** to train a classification model on the prepared features, evaluating performance using metrics such as **AUC of 0.82** on a held-out test set.
- Integrated the feature pipeline into a production workflow on **AWS SageMaker**, supporting ongoing model retraining and scoring operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
