PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Defined and executed risk-based test plans for new platform features, ensuring comprehensive coverage of user interfaces, APIs, and critical user journeys.
- Developed and maintained **automated test suites** using **Playwright** with **TypeScript**, integrating them into the CI/CD pipeline to enable early defect detection.
- Collaborated with software engineers and business analysts from the design phase to enhance system testability and proactively identify potential delivery risks.
- Investigated and triaged defects, performing root-cause analysis to ensure accurate reporting and implementing sustainable improvements to prevent recurrence.
- Validated data migrations and platform upgrades, including non-functional testing for **security** and **performance**, supporting client User Acceptance Testing.
- Mentored junior QA engineers on defect prevention strategies and effective test automation techniques, promoting quality as a shared responsibility.
- Containerized test environments using **Docker** for consistent and repeatable test execution across development and QA stages.

SKILLS

Testing Frameworks – Playwright, TypeScript, Selenium, Cypress, Postman, Newman

API Testing – API Testing, Contract Testing

Databases – SQL, Data Validation, Troubleshooting

Methodologies – Agile, Risk-Based Testing, Test Pyramid, Defect Prevention

Cloud & DevOps – CI/CD, Azure DevOps, Docker

Programming Languages – TypeScript, Python, Java

PROJECTS

Claims Management Platform Test Automation

- Designed and implemented an end-to-end test automation framework using **Playwright** and **TypeScript** for a claims management platform, covering core user journeys.
- Integrated automated tests into the **CI/CD** pipeline (Azure DevOps), providing daily quality reports and reducing manual regression testing effort by approximately 45%.
- Developed API tests using **Postman** and **Newman** to validate service integrations and ensure data consistency across platform components.

Financial Services Integration Testing

- Executed comprehensive testing for integrations between the core platform and external financial services, focusing on data integrity and asynchronous workflows.
- Validated complex transaction flows and reconciliation processes using **SQL** queries against PostgreSQL databases to ensure accurate data processing and audit trails.
- Contributed to risk-based test planning, identifying critical integration failure modes and ensuring robust testing for platform resilience.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
