HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed extensive datasets for a financial services client, refining data preprocessing and visualization techniques to support operational alerting for approximately **3,200 failed payments** per week.
- Applied machine learning methods to derive insights from large datasets, including identifying and structuring data within **Excel interface** environments for risk analytics.
- Constructed machine learning pipelines using **Python** for various applications across commerce and finance, working in collaboration with a multidisciplinary team.
- Developed scientific tests and optimized model performance using technologies like **no-code databases** and data mining principles.
- Engaged with internal stakeholders to comprehend business data, develop hypotheses, and evaluate strategies, including the application of **T-tests** for analytical assessment.
- Acquired and applied advanced analytical techniques using tools such as **Tableau** to address specific business challenges and devise innovative solutions.
- Created reports and presentations to effectively convey data analysis methodologies and findings to business stakeholders, enhancing understanding of complex datasets.

SKILLS

Data Analysis & Modeling – Data Management, Data Analysis, Data Modeling, Exploratory Data Analysis (EDA), Risk Analytics, Statistical Analysis, Hypothesis Testing, T-tests, Machine Learning, Data Mining

Programming & Scripting – Python, SQL

Data Visualization & BI Tools – Power BI, Tableau, Excel Interface Structures

ML Pipeline & Operations – Machine Learning Pipelines, Model Performance Optimization, No-code Databases

Collaboration & Communication – Stakeholder Engagement, Teamwork, Reporting, Presentations

PROJECTS

Financial Risk Analytics Dashboard

- Developed a dashboard using **Power BI** to visualize key risk indicators derived from extensive financial transaction datasets.
- Applied **Python** scripting for data preprocessing and ETL, cleaning and transforming raw data for effective analysis and reporting.
- Collaborated with business analysts to gather requirements and ensure the dashboard accurately reflected critical risk metrics for internal stakeholders.

Customer Transaction Analysis & Insights

- Analyzed transaction datasets using **SQL** and **Python** (pandas, NumPy) to identify patterns and extract actionable insights for business decision-making.
- Modeled transaction flows to understand customer behavior and potential areas for improvement, utilizing statistical methods.
- Presented findings and visualizations from the analysis to internal teams, facilitating data-informed strategic planning.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
