HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented robust **AWS security controls**, including **IAM policies**, **security groups**, and **VPC configurations** to enforce least-privilege access across production environments.
- Developed automated **security detection logic** using **AWS CloudWatch Events** and **Lambda functions** to identify and alert on anomalous activity within the cloud infrastructure, reducing manual review effort by 40%.
- Managed and responded to critical security incidents, performing **root cause analysis** and implementing remediation steps on **Linux** and **Java Spring Boot** systems, contributing to a 20% faster resolution time for P1 incidents.
- Authored and maintained comprehensive **incident response playbooks** and runbooks, standardizing procedures for common security events and improving team readiness.
- Configured and maintained CI/CD pipelines using **Jenkins** and **Git**, integrating **security scanning tools** to ensure code quality and compliance before deployment to **AWS EC2** instances.
- Collaborated with cross-functional engineering teams to integrate security requirements into the software development lifecycle, ensuring secure coding practices and timely vulnerability patching.
- Analyzed system logs and audit trails using **Splunk** and **Dynatrace** to investigate potential security breaches and ensure regulatory compliance for financial services operations.

SKILLS

Cloud Security – AWS IAM, Security Groups, VPC, CloudTrail, GuardDuty, Inspector, Detective, Security Hub, KMS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, VPC, IAM, RDS)

Programming & Scripting – Python, Java, Spring Boot, SQL

DevOps & CI/CD – Jenkins, Git, Docker, Linux, Shell Scripting

Security Operations – Incident Response, SIEM, Log Analysis, Vulnerability Management, Threat Detection

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

PROJECTS

AWS Security Hardening Framework

- Developed a standardized framework for hardening AWS environments, encompassing **IAM role definition**, **network segmentation**, and **data encryption policies** using **Python** scripts.
- Automated the deployment of security configurations for new AWS accounts using **AWS CloudFormation** templates, ensuring consistent security posture across multiple environments.
- Integrated **AWS Security Hub** findings into a centralized dashboard, enabling proactive identification and remediation of compliance deviations.

Automated Threat Detection & Response

- Engineered a Python-based system to monitor AWS CloudTrail logs for suspicious API call patterns, triggering alerts via **AWS SNS**.
- Built **AWS Lambda functions** to automatically isolate compromised EC2 instances by modifying security group rules and creating snapshots, reducing manual intervention time by over 75% during simulated incidents.
- Implemented data validation checks for incoming transaction data on a financial operations dashboard, ensuring data integrity and flagging anomalies for further investigation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
