PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented custom solutions using **Apex** and **LWC** to extend Sales Cloud functionality, directly addressing requirements gathered from Product Owners.
- Developed and deployed **REST API integrations** for seamless data exchange between Salesforce platform and external enterprise systems, enhancing data flow efficiency.
- Configured and managed **Salesforce Flows** to automate complex business processes within Service Cloud, reducing manual intervention by an estimated **30%** for the operations team.
- Collaborated with BAs and QA teams within an Agile framework to deliver high-quality, customised Salesforce solutions, participating in sprint planning and code reviews.
- Contributed to the design and implementation of platform events to enable real-time communication between different Salesforce modules and integrated applications.
- Maintained and enhanced existing **Visualforce pages** to ensure backward compatibility and improved user experience for critical customer-facing modules.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, ensuring scalable and reliable application infrastructure.

SKILLS

Core Salesforce – Apex, LWC, Visualforce, Flows, Sales Cloud, Service Cloud, Platform Events, REST API Integrations

Development Tools – Git, Jenkins, Jira, Confluence

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Languages – Java, Python, SQL

Methodologies – Agile, Scrum

PROJECTS

Enterprise System Integration with Salesforce APIs

- Developed **Java Spring Boot** microservices to act as middleware, facilitating bidirectional data synchronization between an enterprise ERP system and **Salesforce**.
- Designed and implemented robust **REST APIs** for secure data transfer, handling approximately **2,500 transactions** daily across the integrated platforms.
- Managed data transformation logic using **Python scripts** to ensure data consistency and adherence to schema requirements between the disparate systems.

Customer Data Migration and Reporting Dashboard

- Engineered **Python ETL pipelines** to extract, transform, and load customer data from legacy systems into a PostgreSQL data warehouse for a financial services client.
- Built and deployed interactive **Power BI dashboards** to visualise migration progress and key customer metrics, providing actionable insights to business stakeholders.
- Performed data validation and quality checks using **SQL queries** on the PostgreSQL database, ensuring data integrity post-migration.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
