PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Automated infrastructure provisioning and configuration management for cloud foundations using **Terraform** and **Ansible**, reducing manual deployment time by **40%**.
- Managed and maintained **GKE clusters**, implementing upgrades, security patches, and performance tuning to ensure high availability for containerized applications.
- Designed and enforced **least-privilege IAM policies** across GCP services, integrating with **HashiCorp Vault** for secure secret management and access control.
- Enhanced CI/CD pipelines using **Cloud Build** and **GitHub Actions** to automate build, test, and deployment processes for cloud-native applications.
- Implemented comprehensive observability strategies with **OpenTelemetry**, collecting metrics, logs, and traces to provide deep insights into application and infrastructure performance.
- Developed Python scripts to automate security checks and compliance reporting against cloud configurations, identifying and remediating over **50 potential vulnerabilities**.
- Containerized backend services using **Docker** and deployed them to **GKE**, configuring Kubernetes resources and ensuring efficient scaling and resource utilization.

SKILLS

Cloud Platforms – Google Cloud Platform (GCP), AWS

Infrastructure as Code – Terraform, Ansible

Container Orchestration – Google Kubernetes Engine (GKE), Docker, Kubernetes

CI/CD – Cloud Build, GitHub Actions, Jenkins

Observability – OpenTelemetry, Splunk, Dynatrace, CloudWatch

Security – IAM, Secret Management, HashiCorp Vault

PROJECTS

GCP Cloud Foundation Security Hardening

- Automated the deployment of secure GCP network infrastructure, including VPCs, firewalls, and private access configurations, using **Terraform**.
- Implemented fine-grained **IAM policies** for service accounts and user access, adhering to the principle of least privilege for all GCP resources.
- Integrated **HashiCorp Vault** for centralized management of secrets, API keys, and certificates used by cloud applications.

Kubernetes Cluster Security and Automation

- Configured and secured **GKE clusters**, applying security best practices for node pools, network policies, and RBAC configurations.
- Developed Python scripts to automate the deployment and scaling of containerized applications onto Kubernetes, integrating with **Cloud Build** for CI/CD.
- Established logging and monitoring pipelines using **OpenTelemetry** and **Cloud Logging** to ensure visibility into cluster health and application performance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
