HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **ETL pipelines** using **SQL Server Integration Services (SSIS)** to ingest and transform data from various sources into the data warehouse, processing approximately **2 TB** of data weekly.
- Developed and optimized complex **SQL queries**, stored procedures, and functions within **SQL Server Management Studio (SSMS)**, reducing query execution times for critical reports by an average of **30%**.
- Built and maintained interactive **SSRS reports and dashboards**, translating business requirements into actionable data visualizations for operational monitoring and decision-making.
- Collaborated with business stakeholders to gather requirements, perform data analysis, and validate data accuracy for reporting needs, ensuring alignment with strategic objectives.
- Managed and tuned **SQL Server databases** for performance and scalability, implementing indexing strategies and query optimization techniques to handle large datasets effectively.
- Monitored and resolved **data-related issues** and system bottlenecks in production environments, performing root cause analysis to prevent recurrence and maintain data integrity.
- Containerized **Python data processing scripts** using **Docker** and deployed them to an **AWS EC2** instance, enabling automated data pipeline execution.

SKILLS

Database Technologies – Microsoft SQL Server, SSMS, SSRS, SSIS, PostgreSQL, MySQL, Oracle

Data Warehousing & ETL – SQL Server, SSIS, Data Pipelines, Data Integration, ETL Development, Data Modelling

Analytical Tools & Languages – SAS, SQL, Python, R, Power BI, Tableau, DAX, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Data Governance & Security – Data Accuracy, Data Integrity, Data Consistency, Regulatory Environment, Data Governance Practices, Data Security Practices

PROJECTS

Financial Operations Data Warehouse Enhancement

- Developed **ETL processes** using **SSIS** to integrate data from legacy financial systems into a centralized data warehouse, supporting reconciliation workflows.
- Wrote complex **SQL queries** and stored procedures to extract and transform approximately **500 GB** of transaction data daily for reporting purposes.
- Implemented data validation checks and error handling within the pipelines to ensure data accuracy and consistency for downstream analysis.

Customer Transactional Data Analysis Platform

- Designed and implemented a data mart in **SQL Server** to consolidate customer transactional data, enabling enhanced reporting and analytics.
- Created **Power BI dashboards** to visualize key customer behavior patterns and transaction volumes, providing insights to business stakeholders.
- Performed ad-hoc data analysis using **SQL** and **Python (pandas)** to answer specific business questions related to customer segmentation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
