HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained ETL pipelines using **SQL Server Integration Services (SSIS)**, transforming and loading data from various sources into the data warehouse, processing approximately 500 GB of data weekly.
- Wrote and optimized complex **SQL Server queries**, stored procedures, and functions within **SQL Server Management Studio (SSMS)** to support reporting requirements and ensure data integrity for over 10,000 transaction records daily.
- Designed and built interactive dashboards and reports using **SQL Server Reporting Services (SSRS)**, visualizing key performance indicators for business stakeholders and enabling data-driven decision-making.
- Managed and tuned **SQL Server databases** for optimal performance and scalability, implementing indexing strategies and query tuning techniques that reduced average query execution time by **18%**.
- Collaborated with business stakeholders to translate complex reporting requirements into actionable data solutions, ensuring data accuracy and consistency across integrated systems.
- Performed data analysis and validation using **SAS programming** to support critical business decisions and regulatory compliance, identifying discrepancies in datasets exceeding 1 TB.
- Implemented data governance and security practices within the data engineering workflows, ensuring data accuracy, integrity, and adherence to regulatory standards.

SKILLS

Database Technologies – Microsoft SQL Server, SQL Server Management Studio (SSMS), SQL Server Reporting Services (SSRS), SQL Server Integration Services (SSIS), PostgreSQL, MySQL, Oracle

Data Analysis & BI – SAS (Base, EG SAS, Programming), Power BI, Tableau, DAX, Power Query, Data Warehousing Concepts, Data Modelling

Programming & Scripting – SQL, Python, R

Cloud & Infrastructure – Azure SQL, AWS (EC2, S3, Lambda, CloudWatch)

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile/Scrum

PROJECTS

Financial Data Pipeline and Reporting System (HCL Technologies)

- Engineered an ETL pipeline using **SSIS** to ingest and transform financial transaction data from multiple relational sources into a central data warehouse, handling approximately 300 GB of daily data.
- Developed a suite of **SSRS reports** and interactive dashboards to monitor transaction flows and reconcile operational data, providing visibility to the financial operations team.
- Optimized complex **SQL queries** and database structures within SQL Server, improving report generation speed by an average of **22%** and ensuring data accuracy for audit trails.

Customer Transaction Analytics Platform (MSc Project)

- Designed and implemented data models and ETL processes using **Power Query** and **DAX** in **Power BI** to analyze customer transaction patterns from anonymized datasets.
- Built interactive dashboards visualizing key customer analytics, including spending habits and transaction frequency, which were presented to academic and industry stakeholders.
- Applied statistical methods and **SQL** to validate data integrity and derive insights, supporting business intelligence reporting for the project's applied research component.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
