PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed and documented business requirements for enhancements to insurance applications, focusing on claims processing workflows and automated invoice verification systems, translating them into detailed specifications for IT specialists.
- Managed requirements throughout their lifecycle, from initial concept development and specification to implementation and validation, ensuring alignment with business stakeholders and regulatory needs within the Swiss health insurance sector.
- Contributed to the continuous improvement of insurance applications by supporting error analysis and resolution, ensuring functional and technical quality for applications used in the health and accident insurance sector.
- Configured and maintained insurance applications, including updating reference data and tariff information, ensuring accuracy and compliance with sector-specific regulations.
- Participated in customer projects, coordinating release planning and implementation with business teams and system providers to ensure smooth deployment of application updates.
- Monitored legislative and regulatory developments in the Swiss insurance market, identifying resulting business and system requirements to inform application updates and process optimizations.
- Developed Python scripts to automate data extraction and reporting tasks for operational dashboards, reducing manual effort by an estimated **15%** across the team.

SKILLS

Business Analysis – Requirements Engineering, Process Analysis, Stakeholder Management, Documentation, UAT, Release Management

Insurance Domain – Health Insurance, Accident Insurance, Claims Processing, Invoice Verification, Insurance Tariffs, Swiss Health Insurance Act (KVG), Insurance Contract Act (VVG)

Technical Skills – SQL, Java, Spring Boot, Python, REST APIs, AWS, Docker, Linux, Git, Jenkins, Jira, Confluence

Data & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, ETL

Analytics & ML – R, pandas, NumPy, scikit-learn, Statistical Analysis, Regression, Hypothesis Testing, Machine Learning Fundamentals

PROJECTS

Health Insurance Claims Processing Optimization (HCL Technologies)

- Collaborated with business analysts and operations teams to map existing claims processing workflows, identifying bottlenecks and areas for automation within a financial-services client's operational dashboard.
- Designed and documented specifications for system enhancements to automate invoice verification processes, including data validation rules and integration points with upstream and downstream systems.
- Supported user acceptance testing (UAT) for new application features, gathering feedback from business stakeholders to ensure solutions met operational and regulatory requirements.

MSc Data Analytics Applied Project: Power BI Dashboard for Operational Metrics

- Developed a comprehensive Power BI dashboard to visualize key operational metrics derived from enterprise systems, enabling business stakeholders to monitor performance and identify trends.
- Applied Power Query for ETL processes to clean and transform data from multiple sources, creating a robust data model using DAX measures for accurate reporting on system health and transaction flows.
- Published interactive dashboards to Power BI service, facilitating data-driven decision-making for an audience of 10+ business users and operations team members.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
