PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Developed and maintained **JPA** entities and database schemas for core financial transaction processing, ensuring data integrity across multiple relational databases.
- Authored **JUnit** and **Mockito** test suites for Java components, achieving over 85% code coverage and reducing critical bugs in production releases by **15%**.
- Contributed to architecture and design artifacts for complex applications, ensuring design constraints were met through diligent software code development and peer reviews.
- Analyzed and synthesized large, diverse datasets using **SQL** to generate visualizations and reporting, driving continuous improvement of software applications and system performance.
- Participated in agile ceremonies including sprint planning and technical estimations, contributing to the timely delivery of software solutions within a collaborative team environment.
- Containerized Java applications using **Docker** and deployed them to an **AWS EC2** environment, configuring basic resource limits and monitoring with **CloudWatch** for predictable rollouts.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools – Splunk, Dynatrace, Jira, Confluence

BI/Analytics – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Enterprise Java Payments Processing Service

- Developed a high-throughput **Java Spring Boot** microservice to process financial transaction messages, handling approximately **4,500 messages per hour**.
- Implemented robust error handling and reconciliation workflows using **JPA** and **PostgreSQL**, ensuring accurate state management for asynchronous payment operations.
- Integrated the service with upstream and downstream systems via REST APIs, contributing to a unified view of transaction statuses for operational teams.

Automated Data Validation and Reporting Pipeline

- Engineered a **Python**-based ETL pipeline to automate data extraction, transformation, and loading from multiple enterprise systems into a central data mart.
- Created scheduled reports and alerts using **pandas** and **SQL**, reducing manual reporting effort by **30%** for the finance operations team.
- Deployed and managed the pipeline on **AWS Lambda**, ensuring reliable execution of daily data ingestion tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
