HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for identity verification services, handling over 5,000 requests per minute during peak load.
- Developed **Python** scripts to automate the ingestion and transformation of threat intelligence feeds into a centralized data store, reducing manual processing time by **40%**.
- Wrote **SQL** queries and performed data validation on **PostgreSQL** databases to support identity anomaly detection, ensuring data integrity for ML model inputs.
- Owned and delivered complete feature areas for large-scale identity protection solutions, including design, architecture, implementation, and ensuring secure long-term support.
- Contributed to the development of highly resilient systems providing defense-in-depth against attacks scaling up to a billion requests per day, focusing on fraud detection mechanisms.
- Participated in an on-call rota, ensuring reliable, uninterrupted operation of identity services with early detection and rapid resolution of production issues.
- Containerized identity services using **Docker** and deployed them to **AWS EC2** instances, enhancing deployment consistency and simplifying environment management.

SKILLS

Languages – Java, Python, SQL, C++, C#, C

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio

Security & Identity – Identity Protection, Anti-Fraud, Threat Intelligence, Machine Learning Platform

PROJECTS

Real-time Identity Anomaly Detection Service

- Engineered a **Python** service to process streaming identity events, extracting features for anomaly detection models and achieving a p95 latency of **150ms**.
- Developed **SQL** scripts to query and aggregate user activity data from **PostgreSQL**, forming the basis for behavioral analytics and rule-based detection.
- Integrated the anomaly detection service with a **Spring Boot** microservice to flag suspicious sign-up attempts in real-time, preventing automated bot account creation.

Automated Threat Feed Ingestion Pipeline

- Built a **Python** ETL pipeline to ingest and parse multiple threat intelligence feeds from various sources, automating the update of detection rules.
- Implemented data validation and cleansing steps using **pandas**, ensuring the accuracy of ingested signals for downstream machine learning models.
- Scheduled and monitored pipeline runs using **cron jobs** on Linux, ensuring timely delivery of up-to-date threat data to security analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
